FOREWORD

The Reserve Bank of India (RBI) brings out an annual publication entitled “State Finances: A Study of Budgets” which analyses the fiscal position of state governments on the basis of primary state level data. From 2005-06 onwards, this report has been structured around a special theme of topical relevance. The current report’s theme is the *goods and services tax (GST)*. The salient features that emerge from the analysis of state finances in the report are:

- The GST is likely to strengthen cooperative federalism and have far-reaching implications for growth, inflation, public finances and external competitiveness in the Indian economy, drawing on the evidence of significant efficiency gains revealed in empirical evaluation of the implementation of VAT in 2005.
- The GST is likely to bolster states’ revenue and anchor fiscal consolidation without compromising on expenditure quality.
- Seamless implementation of GST is contingent upon a robust dispute resolution mechanism and a sound information technology (IT) infrastructure.
- From a medium term perspective, the GST assumes significance in the context of the debt sustainability of states and the evolving contours of state finances.

The report has been prepared in the Fiscal Analysis Division (FAD) of the Department of Economic and Policy Research (DEPR) under the overall guidance of Shri B.M. Misra, Principal Adviser. The report was prepared under the supervision of Dr. Rajiv Ranjan, Adviser and his team led by Shri Indranil Bhattacharyya, Director. Other members of the team included Dr. Atri Mukherjee, Dr. P.S. Rawat and Dr. Brijesh P. (Assistant Advisers); Shri Anand Prakash Ekka and Shri Khaijamang Mate (Research Officers). Data compilation support was provided by Smt. E. Fernandes, Shri G.N. Hamand and Smt. V. Hashita.

Support was also received from the regional offices of DEPR, other departments of the Reserve Bank (Department of Government and Bank Accounts and Internal Debt Management Department), finance departments of state governments and union territories, the Ministry of Finance, Government of India, the NITI Aayog and the Office of the Comptroller and Auditor General (CAG) of India. This report is available on the RBI’s website (www.rbi.org.in). Feedback/comments are solicited to help improve the analytical or informational content of the report. They may be sent to the Director, Fiscal Analysis Division, Department of Economic and Policy Research, Amar Building (6th Floor), Reserve Bank of India, Shahid Bhagat Singh Road, Mumbai 400 001 or through email to deprfad@rbi.org.in.

1.1 In 2016-17, the finances of states were budgeted to improve at the consolidated level from the sharp deterioration in 2015-16 where the revised estimates (RE) of the gross fiscal deficit-gross domestic product (GFD-GDP) ratio breached the threshold of 3 per cent for the first time since 2004-05. The turnaround was premised on a surplus in the revenue account alongside a decline in loans and advances even as states planned for an increase in capital outlay so that fiscal consolidation is achieved through revenue augmentation rather than growth-inhibiting expenditure reduction. Key to the sustainability of this strategy over the medium term is the legislative approval of the Goods and Services Tax (GST) Act in September 2016 and its subsequent enactment into law with likely implementation from July 1, 2017. The GST is widely regarded as a critical structural reform with broader ramifications in terms of growth, inflation, fiscal viability and external competitiveness. Accordingly, this year's report adopts the GST as its theme¹.

1.2 Chapter II undertakes an in-depth analysis of the fiscal position of states. It draws attention to the worsening of the GFD-GDP ratio on account of the increase in capital outlay and loans and advances to power projects (around ₹990 billion were borrowed under UDAY by eight states during 2015-16). Although states projected for an improvement in the consolidated GFD-GDP

ratio in 2016-17, information available for 25 states reveals a slippage of 0.4 per cent of GDP from budgeted estimates. States, however, are expected to continue their efforts towards fiscal consolidation. In fact, the consolidated GFD-GDP ratio of states is budgeted to improve in 2017-18. Implications for state level indebtedness is also addressed in this chapter. Finally, the chapter undertakes a detailed evaluation of debt sustainability at the state level which indicates that state governments are likely to remain solvent over the medium term.

1.3 Chapter III of the report provides a synoptic view of the design, mechanism and benefits of GST, drawing on the implementation of the VAT in India in 2005 and the lessons from the country experience. The Chapter evaluates the long term gains of implementing GST: (i) broadening the tax base by switching from an income-based to a consumption-based tax; (ii) reducing compliance cost; (iii) enhancing export competitiveness; (iv) promoting a conducive investment climate in the economy; and (v) triggering positive sentiments of foreign investors. It shows that these benefits are advantageous for higher growth over the medium term and significantly outweigh short-term costs in terms of the pass-through of GST to inflation [nearly 50 per cent of the consumer price index (CPI) is outside the ambit of GST]. On the fiscal front, tax buoyancy is expected to increase substantially reducing reliance on borrowings,

¹ All information on GST related policy developments are as of March 31, 2017.

improving debt servicing capacity and opening up greater space for fiscal consolidation.

1.4 Chapter IV explores some issues relating to GST: the revenue neutral rate; dispute resolution mechanism and IT infrastructure; and administrative control of GST. From a medium term perspective on state finances, this Chapter also addresses various issues relating to central transfers, implications of special levies and evolving fiscal federalism. In this context, it is pertinent to note that the likely implementation of the recommendations of the state pay commissions may enhance the committed expenditure burden on states, which may lead to greater recourse to additional borrowing. At the same time, greater devolution of resources to states through statutory transfers may increase the quantum of untied funds at the disposal of states in prioritising their developmental objectives.

1.5 Chapter V presents a synoptic view of the report with possible implications of recent

policy developments on state finances in the years ahead. It cautions about the increase in future liabilities of states if they jump onto the “bandwagon” of farm loan waivers. In terms of general government finances, Centre’s efforts to carry forward fiscal consolidation could be squandered unless state finances are shored up and strengthened. As of now, the budgeted consolidated GFD-GSDP ratio of 25 states at 2.6 per cent for 2017-18 is lower than the Central Government’s budgeted GFD-GDP ratio of 3.2 per cent. In this context, the Fiscal Responsibility and Budget Management (FRBM) review Committee’s recommendation for adopting the fiscal deficit as the key operational target consistent with achieving the combined government debt-GDP ratio of 60 per cent by financial year 2022-23 (FY 2023) assumes critical significance.

1.6 Data on various budgetary components and fiscal indicators of 29 states are presented in appendices and statements.

II

Fiscal Position of State Governments¹

The consolidated fiscal position of states deteriorated sharply during 2014-15 and 2015-16 (RE). Although states budgeted for an improvement in 2016-17 (BE), data for 25 states (RE) show some deterioration in fiscal position. Relaxations in market borrowings provided by the Fourteenth Finance Commission (FC-XIV) have allowed many of the states to mobilise additional resources. Despite the increase in the debt burden of the states in recent years, the overall fiscal position is found to be sustainable in the long run. Based on information pertaining to 25 states, the consolidated gross fiscal deficit to gross state domestic product (GFD-GSDP) ratio is budgeted to moderate to 2.6 per cent in 2017-18.

1. Introduction

2.1 The consolidated finances of states has deteriorated in recent years, with the GFD-GDP ratio averaging around 2.5 per cent in the last five years (2011-12 to 2015-16) as compared with 2.1 per cent during the previous quinquennium (Table II.1). The GFD-GDP ratio in 2015-16 (RE) breached the 3 per cent² ceiling of fiscal prudence for the first time since 2004-05. Information on 25 states indicate that the improvement in fiscal metrics budgeted by states for 2016-17 may not materialise. It is expected that states will take necessary steps to consolidate their fiscal position.

2. Accounts: 2014-15

2.2 At the consolidated level, key deficit indicators of states deteriorated in 2014-15

(Chart II.1), with special category (SC) states³ posting the largest erosion (Table II.2).

2.3 On the receipts side, grants from the Centre increased significantly, reflecting

¹ The analysis of various fiscal indicators is in proportion to GDP, unless stated otherwise. Moreover, the analysis pertains to Final Accounts for 2014-15, Revised Estimates (RE) for 2015-16 and Budget Estimates (BE) for 2016-17.

² The threshold of 3 per cent GFD-GSDP ratio was first recommended by the Twelfth Finance Commission (FC-XII) and later endorsed by both the Thirteenth Finance Commission (FC-XIII) as well as the Fourteenth Finance Commission (FC-XIV). It has also been acknowledged by state governments in their respective Fiscal Responsibility and Budget Management (FRBM) Acts. At the consolidated state level, 3 per cent of GFD-GDP ratio was previously breached in 2004-05.

³ Of the twenty nine states, there are eleven special category (SC) states and eighteen non-special category (NSC) states. The SC states include Arunachal Pradesh, Assam, Himachal Pradesh, Jammu and Kashmir, Manipur, Meghalaya, Mizoram, Nagaland, Sikkim, Tripura and Uttarakhand while NSC states are Andhra Pradesh, Bihar, Chhattisgarh, Goa, Gujarat, Haryana, Jharkhand, Karnataka, Kerala, Madhya Pradesh, Maharashtra, Odisha, Punjab, Rajasthan, Tamil Nadu, Telangana, Uttar Pradesh and West Bengal.

changes in the pattern of funding of centrally sponsored schemes (CSS)⁴. Consequently, enhanced central transfers provided a boost to revenue receipts (Table II.3). On the

expenditure side, there was a significant increase in development expenditure (Table II.4). Both revenue and capital expenditure⁵ increased, the former outpacing the latter.

⁴ Prior to 2014-15, funds under CSS were transferred through the dual mode of i) state budgets; and ii) direct transfer to district rural development agencies and independent societies. In this regard, state governments had expressed their concern as direct transfers to the implementing agencies circumvented the state budgets. To address this issue, the entire financial assistance to the states for CSS is being routed from 2014-15 through the consolidated funds of the states.

⁵ Capital expenditure includes both capital outlay and loans and advances.

BE: Budget Estimates. RE: Revised Estimates.

Note: 1. Figures in parentheses are percentages to GDP.

2. Debt Receipts are on net basis.

Source: Budget Documents of state governments.

Revenue expenditure rose significantly in respect of items such as education, sports, art and culture, and rural development. Capital expenditure increased on account of growth in capital outlay for items such as housing, dairy development, rural development, and energy.

3. Revised Estimates: 2015-16

2.4 The combined fiscal position of states deteriorated sharply in 2015-16 (RE) from the

budgeted estimates for the year. For the first time in more than 10 years, the GFD-GDP ratio at 3.6 per cent crossed the threshold of 3 per cent, but this was mainly due to the significant increase in capital outlay and loans and advances to power projects (Table II.5). The deficit in the revenue account was lower due to revenue receipts in the form of tax collections and states' own non-tax revenues accelerating over the year and outpacing revenue expenditure. This improvement

was also supported by central transfers⁶; however, the major thrust was through higher devolution of resources from central taxes⁷. With the steep increase in the GFD, primary deficit (PD) was higher despite a marginal increase in interest payments. While the revenue account deteriorated for 13 states from the previous year; among these, six states continued to maintain surpluses. On the other hand, the GFD worsened for 20 states (Table II.6).

2.5 Capital expenditure expanded by one percentage point of GDP in 2015-16 (RE) with developmental expenditure rising faster than non-developmental spending (Table II.4). Within developmental capital outlay, sectors which saw significant growth were major and medium irrigation and flood control, energy, and roads and bridges, reflecting the intent to create growth-enabling infrastructure.

2.6 Loans and advances for power projects increased significantly as an outcome of the

⁶ Central transfers include share in central taxes and grants.

⁷ The Union Government accepted the recommendations of FC-XIV to increase the states' share in the divisible pool of taxes to 42 per cent (earlier 32 per cent) from 2015-16 onwards. It altered the composition of central transfers in favour of statutory transfers from discretionary transfers made earlier. It also led to greater predictability and certainty in the quantum of funds being transferred to the states; additionally, there would be an overall increase in untied funds.

Fiscal Position of State Governments

Ujwal Discom Assurance Yojana (UDAY) scheme. Under the scheme, states took over 75 per cent of Discom debt as on September 30, 2015 over two years – 50 per cent in 2015-16 and 25 per cent in 2016-17. States were allowed to issue non-SLR state development loan (SDL) bonds in the market or directly to banks / FIs holding the Discom debt⁸. As per the RBI records, 8 states⁹ borrowed ₹989.6 billion under UDAY during 2015-16. Net of these bonds, the consolidated state GFD-GDP ratio gets moderated by 0.7 percentage point during 2015-16 to 2.9 per cent from 3.6 per cent in the previous year (Chart II.2)¹⁰.

2.7 The growth in revenue expenditure in 2015-16 (RE) drew from higher development revenue expenditure for education, sports, art and culture, social security and welfare, relief on account of natural calamities,

rural development and energy. Under non-development expenditure, committed expenditure comprising pensions, interest payments and administrative services rose marginally (Chart II.3).

4. Budget Estimate: 2016-17

2.8 At the aggregate level, the key deficit indicators were budgeted to improve in 2016-17 (BE) over a year ago. With revenue receipts budgeted higher than revenue expenditure, a small revenue surplus was expected to accrue. Along with a decline in loans and advances, this would have reduced the GFD-GDP ratio in spite of some increase in capital outlay. The consolidated GFD-GDP ratio was budgeted at 3.0 per cent, resulting in a lower budgeted primary deficit than a year ago.

2.9 An analysis of state-wise positions indicates that while 18 out of 29 states

⁸ See 'Box IV.1: UDAY Scheme – Salient Features' published in State Finances : A Study of Budgets 2015-16, Reserve Bank of India.

⁹ The 8 states are Bihar, Chhattisgarh, Haryana, Jammu & Kashmir, Jharkhand, Punjab, Rajasthan and Uttar Pradesh.

¹⁰ As per the UDAY scheme, the debt taken over by the states will not be included in the calculation of their respective fiscal deficit for the financial years 2015-16 and 2016-17. (Government of India, November 5, 2015).

budgeted for a revenue surplus, 15 budgeted for an improvement in the revenue account (in terms of GSDP¹¹) from the previous year. Improvement in both the GFD-GSDP and PD-GSDP ratios were budgeted by 16 states (Table II.6).

2.10 Capital outlay was budgeted to account for about 99 per cent of GFD in 2016-17 (BE), reflecting a distinct improvement in the quality of the deficit. Over the years, market borrowings has been a dominant source of financing the GFD. As per RBI records, gross market borrowing of states at ₹3,819.8 billion in 2016-17 – comprising around 85 per cent of GFD – increased by 29.7 per cent over the previous year. In contrast, the contributions of

National Small Savings Fund (NSSF), reserve funds, deposits and advances have reduced (Table II.7).

2.11 The increasing reliance on market borrowing, along with the enabling conditions for additional borrowing by states as provided by FC-XIV, poses challenges for the sustainability of state finances as higher state borrowings raise yields and the cost of borrowing (Box II.1). The combined gross market borrowings of the Centre and the states increased by 7.1 per cent during 2016-17.

Revenue Receipts

2.12 Central transfers as well as states' own revenue were budgeted to increase in

¹¹ While the consolidated fiscal position of all states are analysed in terms of GDP, state-wise analysis is based on the respective gross state domestic product (GSDP) of states.

**Box II.1:
Relaxation of Fiscal Rules for States**

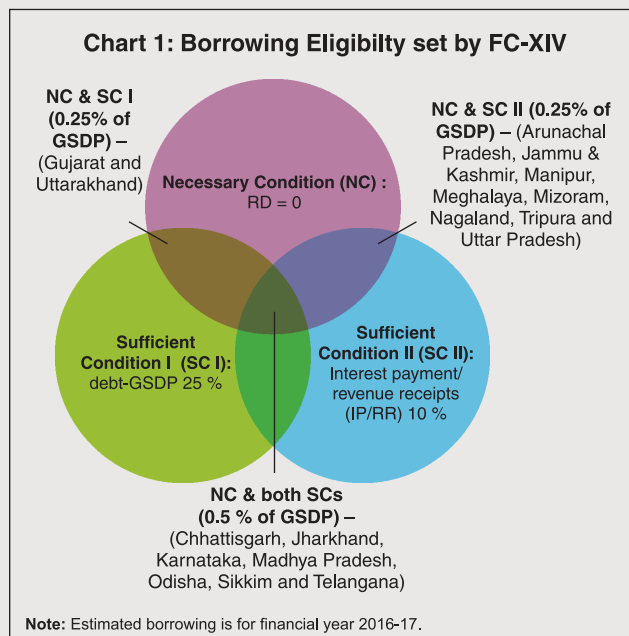

FC-XIV recommended that the fiscal deficit of all states will be anchored to an annual limit of 3 per cent of GSDP for the award period (2015-16 to 2019-20). Relaxations were, however, given to state governments for additional borrowings provided they met some criteria of fiscal prudence. These criteria can be broadly categorised as a) necessary and b) sufficient conditions¹²:

- Necessary Condition (NC): Availing additional borrowing is contingent upon the state recording a zero revenue deficit in the year for which the borrowing limit has to be fixed and in the immediately preceding year.
- Sufficient Conditions (SCs) : An additional borrowing limit of 0.25 per cent each is allowed if:
 - I) SC-I: states' debt-GSDP ratio is less than or equal to 25 per cent in the preceding year,
 - II) SC-II: interest payment/revenue receipts (IP/RR) is less than or equal to 10 per cent in the preceding year.

States meeting one or both of the above criteria are allowed a relaxation in their fiscal deficit targets by 0.25/0.5 per cent of GSDP provided they meet NC.

There were seventeen states which satisfied the NC and at least one of the SCs, becoming eligible for additional borrowing in 2016-17. Out of these states, seven satisfied both the SCs and were eligible to have a maximum GFD-GSDP ratio of 3.5 per cent in 2016-17. There were ten states which satisfied only one of the SCs, becoming eligible for additional borrowings to the extent of 0.25 per cent of GSDP in 2016-17. Consequently, their GFD-GSDP ratio can increase to a maximum of 3.25 per cent.

Information available for 2016-17 suggests that the seven states which actually resorted to additional borrowing can be categorised into three groups: i) states which were eligible

for additional borrowing but remained within the prescribed limit; ii) states which were eligible for additional borrowing but crossed the limit; and iii) states which have borrowed without being eligible for additional borrowing as per the above-mentioned criteria. While two states belong to the first category, three states have borrowed more than their respective limits. Finally, two states who were not eligible for additional borrowing also resorted to borrowing during the year.

Reference

Government of India (2014), "Report of Fourteenth Finance Commission" New Delhi.

2016-17. Both components of central transfers, *i.e.*, the share in central taxes as well as grants from the Centre, were budgeted to increase. Some improvement was budgeted in own tax revenue (OTR) and own non-tax revenue (ONTR). The increase in grants in aid was mainly led by the increase in grants for state plan schemes, while own tax revenue was

higher on account of higher tax collections through "state sales tax/VAT".

Expenditure Pattern

2.13 The consolidated revenue expenditure of states was budgeted to increase in 2016-17 (BE) over a year ago. A significant deceleration in development revenue expenditure was

¹² While FC-XIV has not used the terms "necessary" and "sufficient", these have been used here to simplify the explanation of the condition while retaining its essence.

budgeted mainly on account of lower growth in expenditure for family welfare, housing, labour and labour welfare, social security and welfare, agriculture and allied activities, and rural development. Furthermore, a decline in revenue expenditure (in absolute terms) was budgeted on items like energy, roads and bridges. In contrast, non-development revenue expenditure was budgeted to increase as committed expenditure continued to remain elevated.

2.14 Capital expenditure was budgeted to be lower in 2016-17 (BE) than in the preceding year mainly due to a decline in loans and advances relating to power projects under the UDAY scheme. Capital outlay was budgeted to increase marginally with some deceleration in the growth in development capital outlay for (i) water supply and sanitation, and (ii) roads and bridges. In contrast, a decline was budgeted in (iii) family welfare, (iv) soil and water conservation, (v) agricultural research and education, and (vi) energy. A lower capital outlay in these critical sectors is a matter of concern.

2.15 Social sector expenditure (SSE)¹³ was budgeted to increase, as proportions to GDP and aggregate expenditure¹⁴ (Chart II.4). Disaggregated data, however, showed that SSE (as proportion to aggregate expenditure) was budgeted to decline in 13 states (Statement 35). The composition of expenditure on social services showed that more than 60 per cent was allocated

for spending on education, sports, art and culture, and medical and public health, which will have a positive bearing on social infrastructure (Table II.8).

5. Budget Estimates: 2017-18

2.16 As per the information available for 25 states, the GFD-GSDP ratio is budgeted at 2.6 per cent during 2017-18 as compared with 3.4 per cent during 2016-17 (RE). There are, however, several downside risks like implementation of recommendations of states' own pay commissions, farm loan waiver in some states, and revenue uncertainty on account of the implementation of GST. On a comparable basis, the revised estimates of the GFD for 2016-17 were higher by 0.4 percentage point over the budgeted ratio – raising concerns about potential fiscal slippage (Table II.9).

¹³ Includes expenditure on social services, rural development, food storage, and warehousing.

¹⁴ Includes revenue expenditure, capital outlay, and loans and advances.

**Table II.8: Composition of Expenditure on Social Services
(Revenue and Capital Accounts)**

6. Outstanding Liabilities of State Governments

2.17 Outstanding liabilities of state governments have been registering double digit growth since 2012-13, except in 2014-15. UDAY *inter alia* caused outstanding liabilities to increase by 1.5 percentage points of GDP

in 2016 over 2015 and by 0.7 percentage point in 2017 over 2016 (Table II.10). State-wise data reveal that the debt-GSDP ratio increased for 17 states (Statement 20).

2.18 The interest payments-revenue receipts (IP-RR) was budgeted to rise marginally in 2016-17 (BE), reflecting higher interest burden on account of UDAY bonds (Chart II.5).

Table II.9: Major Deficit Indicators of State Governments

(Per cent to GSDP)

Item	2016-17 (BE)	2016-17 (RE)	2017-18 (BE)

Composition of Debt

2.19 The composition of states' outstanding liabilities indicates greater reliance on market borrowings over the years – they constituted 69.7 per cent of outstanding liabilities of states at end-March 2015 and was budgeted to reach 74.7 per cent by end-March 2017. The share of NSSF in outstanding liabilities

and states' dependence on loans from the Centre, however, continued to decline (Table II.11).

2.20 The weighted average yield on state government securities moderated to 7.48 per cent in 2016-17 from 8.28 per cent in 2015-16. The spread of yields on State Development Loans (SDLs) over the benchmark 10-year Central Government security yield remained broadly stable in the range of 24-114 basis points in 2016-17 as against 21-109 basis points in 2015-16. The weighted average spread of SDLs firmed up by 59 basis points in 2016-17 as compared with 50 basis points in 2015-16. Among the states, Punjab consistently issued securities of 4 and 5 years tenor, utilising borrowing space in the medium-term maturity bucket. Other states such as Andhra Pradesh, Gujarat, Maharashtra and Odisha also issued securities of less than 10 year maturity. States issuing securities of more than 10 year maturity during 2016-17 included Andhra Pradesh, Maharashtra, Telangana, Odisha and Union Territory of Puducherry.

Table II.11: Composition of Outstanding Liabilities of State Governments
(As at end-March)

(Per cent)

RE: Revised Estimate. BE: Budget Estimate.

Source: Same as that for Table II.9.

Maturity Profile of State Government Securities

2.21 As at end-March 2017, 68.0 per cent of the outstanding SDLs were in the residual maturity bucket of five years and above (Table II.12). The redemption of special securities issued under financial restructuring plans (FRPs) for state-owned Discoms entails large repayment obligations from 2018-19. Special securities issued under FRPs are significantly larger in size; consequently, repayment pressure will be aggravated from 2018-19. Power bonds, which were issued to clear outstanding overdues of state electricity boards to the central public sector undertakings (CPSUs), have, however, been extinguished by 2015-16¹⁵.

Liquidity Position and Cash Management

2.22 Several states have been accumulating sizeable cash surpluses in recent years. As a result, liquidity pressures were confined to few states during 2016-17. States' intermediate treasury bills (ITB) balance was ₹1560.59 billion during 2016-17 as against ₹1205.82 billion during 2015-16 while balances on auction treasury bills (ATB) were placed at ₹366.02 billion. States availed higher ways and means advances (WMA) and overdrafts (ODs) more sizably in 2016-17 than in the previous year (Chart II.6).

2.23 The rise in debt burden of the states in the last couple of years has drawn attention to the sustainability of public debt at the sub-national level. In view of this, the following section provides an assessment of the debt

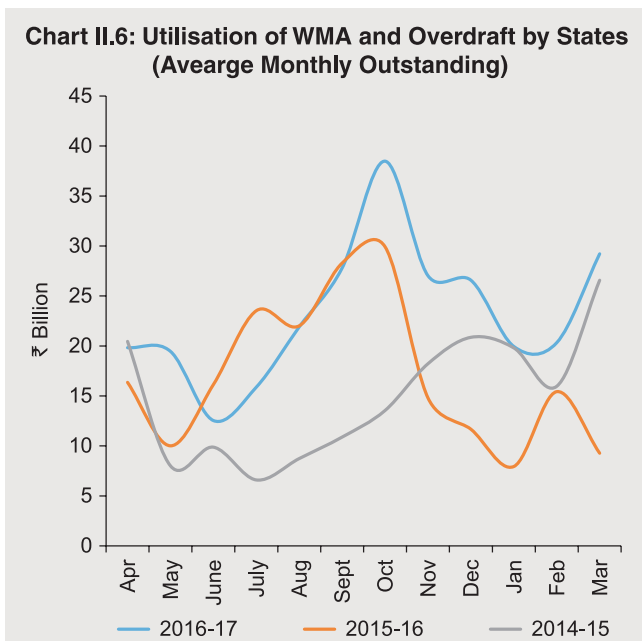

Table II.12: Maturity Profile of Outstanding State Government Securities
(As at end-March 2015)

State	Per cent of Total Amount Outstanding				
	0-1 years	1-3 years	3-5 years	5-7 years	Above 7 years

sustainability of state governments over the medium to long run.

¹⁵ In order to clear outstanding overdues of state electricity boards to the central public sector undertakings (CPSUs), power bonds aggregating ₹336 billion were issued by state governments with retrospective effect from October 1, 2001 in 20 equal tranches to facilitate trading and redemption of the bonds. Each part carried a fixed tenor with bullet redemption, the last being on April 1, 2016.

7. Debt Sustainability of Indian States

2.24 State governments face severe resource constraints as their non-debt receipts are often insufficient for fulfilling their developmental obligations. As a result, they resort to market borrowings to bridge the resource gap. Over a period of time, such borrowings may result in the accumulation of debt liabilities which, if unchecked, could pose major challenges for macroeconomic and financial stability.

State Government Debt

2.25 The evolving debt position of states has seen several phases: a comfortable position prior to 1997-98, followed by sharp deterioration and fiscal stress till 2003-04, then significant improvement since 2004-05 *albeit* with marginal deterioration in the last two years. While the debt liabilities of states increased sharply during 1997-98 to 2003-04, the subsequent consolidation is attributed *inter alia* to the implementation of Fiscal Responsibility and Budget Management (FRBM) Acts at the state level during the last

decade. These initiatives were complemented by debt and interest relief measures by the Central Government and supported by a favourable macroeconomic environment. Majority of the states adhered to the debt targets set by the FC-XIII for the period 2010-2014; however, some breached their targets and were saddled with unsustainable debt positions.

Assessment of Debt Sustainability

2.26 The path of the primary deficit can be sustainable if the real growth of the economy is higher than the real interest rate (Domar, 1944). The level of debt is considered to be sustainable if a country's debt-GDP ratio remains stable; and if the economy generates adequate debt-stabilising primary balance to service the future debt (Buiter, 1985; Blanchard, 1990).

2.27 In the empirical literature, there are primarily two approaches to fiscal/debt sustainability. The first evaluates various indicators of the sustainability of fiscal policy (Miller 1983; Buiter 1985, 1987; Blanchard 1990; Buiter *et al.* 1993), while the second involves empirical validation or tests of government solvency (Hamilton and Flavin 1986; Trehan and Walsh 1988; Bohn 1998). Empirical testing *inter alia* include determination of the sustainable (long-run and maximum) level of public debt based on a partial equilibrium framework, a model-based approach and the signals' approach to fiscal sustainability. While indicators are forward-looking, empirical validation through econometric tests based on historical data are considered backward looking. As a result, a combination of both these approaches has been suggested for drawing additional insights on government solvency (Marini and Piergallini, 2007).

2.28 In the Indian context, empirical studies on debt sustainability of states indicate a mixed picture. While some of the earlier studies point out that the debt position of states are unsustainable (Buiter and Patel 1992; Goyal *et al.* 2004; Misra and Khundrakpam 2009), the more recent ones have drawn attention to the declining debt-GSDP ratios and attributed this improvement to the strong growth performance and the implementation of fiscal rules during 2003-2012 (Dasgupta *et al.* 2012; Makin and Arora 2012; Kaur *et al.* 2014). Consequently, any slowdown in growth over the medium-term could pose risk to the achievement of the GFD-GDP and debt-GDP targets.

2.29 Traditionally, debt sustainability analysis takes into account credit-worthiness (nominal debt stock/own current revenue ratio; present value of debt service/own current revenue ratio) and liquidity indicators (debt service/current revenue ratio and interest payments/current revenue ratio). These indicators broadly provide an assessment of the ability of state governments to service their debt

(interest obligations and repayment) through current and regular sources of revenue.

2.30 An analysis based on various indicators of debt sustainability in different phases during the period 1981-82 to 2015-16 reveals that the rate of growth of debt of states at the aggregate level exceeded nominal GDP growth rate during Phase I, Phase III and Phase V (Table II.13). The Domar stability condition was satisfied in all phases, except Phase III. Both primary balance and primary revenue balance remained negative in all the phases, even as there was some improvement in primary revenue balance-GDP ratio in the last two phases. The tolerable limit of average interest payments to revenue receipts ratio of 20 per cent (Dholakia *et al.* 2004) was breached in Phase III but subsequently came down in Phase IV and further in Phase V.

2.31 The fiscal/debt sustainability exercise is extended beyond the simple indicator-based assessment to empirically validate whether the state governments would remain solvent.

Table II.13: Fiscal Sustainability of All State Governments – Indicator-based Analysis

Sl. No.	Indicators	Symbolic Representation	Phase-I	Phase II	Phase III	Phase IV	Phase V
			(1981-82 to 1991-92)	(1992-93 to 1996-97)	(1997-98 to 2003-04)	(2004-05 to 2011-12)	(2012-13 to 2015-16)
1	2	3	4	5	6	7	8
1	Rate of growth of public debt (D) should be lower than rate of growth of nominal GDP (G)	$D - G < 0$	2.1	-1.8	7.5	-5.1	1.4
2	Real rate of interest (r) should be lower than real output growth (g)	$r - g < 0$	-7.2	-6.0	0.0	-6.6	-6.3
3 (a)	Primary balance (PB) to GDP ratio should be in surplus	$PB / GDP > 0$	-1.6	-0.8	-1.6	-0.3	-1.1
3 (b)	Primary revenue balance (PRB) to GDP ratio should be in surplus	$PRB / GDP > 0$	-1.4	-2.5	-4.6	-2.0	-1.6
4 (a)	Revenue Receipts (RR) to GDP ratio should increase over time	$RR / GDP \uparrow \uparrow$	11.3	11.3	10.5	12.0	12.9
4 (b)	Public debt to revenue receipts ratio should decline over time	$D / RR \downarrow \downarrow$	1.8	1.8	2.6	2.2	1.7
5 (a)	Interest burden defined by interest payments (IP) to GDP ratio should decline over time	$IP / GDP \downarrow \downarrow$	1.2	1.8	2.4	2.0	1.5
5 (b)	Interest payments (IP) to revenue receipts (RR) ratio should decline over time	$IP / RR \downarrow \downarrow$	10.4	15.8	22.6	16.5	11.8

This entails test of stationarity properties of the government debt stock, examination of the long-term relationship between government revenues and expenditures, between primary balances and debt, and between capital expenditure and public debt (Bhatt, 2011). While confirmation of stationarity of debt stock (in level and first difference) indicates mean reversion after temporary disturbances,

cointegration between government revenues and expenditures is reflective of co-movement, which is essential for satisfying the inter-temporal budget constraint. Empirical assessment of the inter-temporal budget constraint in a panel data framework covering 20 Indian states for the period 1980-81 to 2015-16 indicates sustainable debt position of states in the long run (Box II.2).

**Box II.2:
Debt Sustainability of Indian States – Inter-Temporal Budget Constraint Approach**

Drawing from the empirical literature, fiscal sustainability is analysed from the perspective of satisfying the inter-temporal budget constraint. This requires that government expenditure, revenues and debt stock are all stationary in their first differences [I(1)]. The stationarity property also restricts the extent of deviation of government expenditure from revenues over time. In case government expenditure and revenues are I(1) and cointegrated, then the error correction mechanism would push government finances towards the levels required by the inter-temporal budget constraint and ensure fiscal and debt sustainability in the long term (Cashin and Olekalns, 2000).

First, the stationarity properties of state government debt, revenues and expenditure (logarithmic transformation and in real terms) are tested through panel unit root tests for the period 1980-81 to 2015-16 covering 20 Indian states¹⁶. The results of panel unit root tests (Levin, Lin and Chu; Im, Pesaran and Shin; and Maddala and Wu test statistics) reveal that the three variables viz., debt, total revenues and total expenditure are I(1).

Second, since both revenue and expenditure were found to be I(1), an attempt is made to test whether there exists a long-run equilibrium (steady state) relationship between government expenditure and revenues through panel cointegration tests. Using the extant methodology (Pedroni, 1999), the test results for both the panel and group statistics reveal strong evidence of panel cointegration (Table 1). The estimated ‘Rho’ statistics, variance ratio ‘V’ statistics, Augmented Dickey Fuller ‘t’ statistics and the Phillips and Perron (non-parametric) ‘t’ statistics reject the null hypothesis of no cointegration at 1 per cent level for all the three models.

Table 1: Panel Cointegration Tests for Government Revenue and Expenditure

Test Statistics	Panel Statistics	Group Statistics
1	2	3
<i>Model with no deterministic intercept or trend</i>		
V statistics	12.20* (0.00)	
Rho statistics	-11.16* (0.00)	-8.27* (0.00)
PP statistics	-7.76* (0.00)	-8.90* (0.00)
ADF statistics	-7.45* (0.00)	-8.50* (0.00)
<i>Model with individual intercept and no deterministic trend</i>		
V statistics	9.43* (0.00)	
Rho statistics	-9.90* (0.00)	-6.87* (0.00)
PP statistics	-8.26* (0.00)	-7.61* (0.00)
ADF statistics	-8.45* (0.00)	-8.11* (0.00)
<i>Model with individual intercept and individual trend</i>		
V statistics	14.46* (0.00)	
Rho statistics	-6.63* (0.00)	-3.83* (0.00)
PP statistics	-6.62* (0.00)	-6.47* (0.00)
ADF statistics	-6.92* (0.00)	-6.25* (0.00)

Notes: 1. All reported values are asymptotically distributed as standard normal.
2. Figures in the parentheses indicate the respective p-values.
3. * indicates the rejection of the null hypothesis of no cointegration at 1 per cent level of significance.
4. Automatic selection of lags through Schwarz Information Criteria (SIC).
5. Newly West bandwidth selection using a Bartlett kernel.

(Contd...)

¹⁶ The states covered are Andhra Pradesh, Assam, Bihar, Gujarat, Haryana, Himachal Pradesh, Jammu & Kashmir, Karnataka, Kerala, Maharashtra, Manipur, Meghalaya, Madhya Pradesh, Odisha, Punjab, Rajasthan, Tamil Nadu, Tripura, Uttar Pradesh and West Bengal, for which data on all the relevant variables are available for the entire time period. In the case of Bihar, Uttar Pradesh and Madhya Pradesh, the data on respective fiscal variables from 2000-01 also include data relating to Jharkhand, Uttarakhand and Chhattisgarh, respectively. This has been done to ensure comparability of data for the entire period covered in the econometric exercise.

Thus, the overall findings of the panel cointegration tests reveal that government revenues and expenditure are cointegrated, indicating long-term co-movement. Along with the stationary property, these results suggest that the current fiscal policies pursued by states are sustainable in the long run, which is in line with recent findings (Kaur *et al.*, 2014).

8. Concluding Observations

2.32 After a gap of more than 10 years, the GFD-GDP ratio crossed 3 per cent in 2015-16 (RE) despite some moderation in the revenue deficit. Mitigating factors were reflected in higher provisioning for capital outlay and loans and advances. A budgeted surplus in the revenue account and a decline in loans and advances were expected to help reduce the GFD-GDP gap in the budget estimates of 2016-17.

2.33 Information pertaining to 25 major states indicates slippage in the deficit indicators in 2016-17 (RE) from the budget estimates. These states, however, have projected an improvement in their fiscal position in 2017-18 (BE). It is pertinent to note that many state governments are in the process of setting up their pay commissions which may impact projected deficit indicators.

2.34 Notwithstanding the deterioration of the debt position of state governments in the preceding two years due to their participation in the financial and operational restructuring of state power distribution companies through UDAY, empirical evaluation reveals that the current fiscal policies of states are sustainable in the long run.

2.35 Due to prevailing uncertainty about the revenue outcome from the GST implementation, the outlook for revenue receipts of states could turn uncertain. There is, however, the cushion of compensation by the Centre for any loss of revenue for the initial five years. In this context, GST remains the best bet for states in clawing back to the path of fiscal consolidation over the medium term. From this perspective, the current report focusses on the GST as its theme which is discussed in the following chapter.

III

Goods and Services Tax: A Game Changer

The GST is likely to roll out on July 1, 2017. Given the cross-country experience and empirical evidence on efficiency gains from the Value Added Tax (VAT) in the Indian context, we conjecture that implementation of GST is likely to ensure higher tax buoyancy and an improvement in government finances over the medium term.

1. Introduction

3.1 The goods and services tax (GST) Bill was passed unanimously in the Parliament in August, 2016 reflecting cooperative fiscal federalism in the pursuit of reforms. After ratification by a majority of states and assent of the President, it was enacted as Constitution (One Hundred and First Amendment) Act, 2016¹. The GST is the largest tax reform in India, paving the way for a single national market by merging several central and state taxes². It is also expected to make Indian products more competitive in both domestic and international markets and also attract large inflows of foreign direct investment than before in view of the stability it will impart to the tax regime. At the same time, it will be transparent and easier to administer. Thus, the GST has the potential to raise India's growth trajectory over the medium-term.

3.2 The concept of the GST is not new to India. Earlier in 2005, value added tax (VAT) was introduced on the recommendation of the Report of the Indirect Taxation Enquiry Committee, 1978 (Chairman: L. K. Jha). The

VAT proved to be inherently efficient relative to the sales tax or excise duty or any turnover tax as it minimised tax evasion with an in-built mechanism of multi-stage tax distribution and a cross-auditing practice.

3.3 The introduction of the GST is likely to have an enduring impact on state finances over the medium term for several reasons. First, with states being unable to rationalise their committed expenditure burden (*viz.*, pension liabilities, interest obligations and administrative expenses) in the near term, revenue expansion through GST implementation is a prudent strategy in remaining committed to the path of fiscal consolidation. Second, the GST is likely to chart out a new course for cooperative federalism in India focusing on cooperation between the Centre and states in deciding on (i) tax rates, (ii) exemptions and (iii) commodities featuring in each category of tax rate/slab. Finally, GST implementation may result in augmenting the shareable pool of resources which would result in greater transfer of resources from the Centre to the states. Cumulatively, these issues are likely

¹ As per the Constitution (One Hundred and Twenty Second Amendment) Bill, it has to be ratified by not less than 50 per cent of the states.

² The origin of VAT/GST can be traced far back to the writings of German businessman Wilhelm Von Siemens in 1920s who proposed it as a substitute for the German turnover tax. VAT/GST has since become an important component in the overall fiscal framework of nearly all industrialised countries and in a large number of Latin American, Asian and African countries.

to have a profound impact on state finances in the coming years (see Chapter IV for detailed discussion on each of these issues).

3.4 Against this backdrop, the rest of this chapter is organised into five sections. Section 2 explores the concept of GST and its advantages. Section 3 draws out the key lessons from a cross-country perspective. Section 4 sketches the evolution of GST—from ideas to legislation; the challenges and modalities of implementation. The experience of Indian states with regard to the VAT are empirically explored in Section 5. Concluding observations on the macroeconomic implications of the GST are set out in Section 6.

2. The Concept

3.5 The GST is a destination-based single tax on the supply of goods and services from the manufacturer to the consumer³ and is one

indirect tax for the entire country. GST will replace multiple taxes such as central value added tax (CENVAT), central sales tax, state sales tax and octroi (Table III.1). A common base and common rates across goods and services and similar rates across states and between Centre and states will facilitate better tax administration, improve tax compliance, alleviate cascading or double taxation while also ensuring adequate tax collection from inter-state sales.⁴

3.6 While the VAT is imposed at different stages of production of goods and services, the GST is levied at the national level on consumption of goods and services (Table III.2). Credits of input taxes paid at each stage will be available in subsequent stages of value addition, which makes GST essentially a tax on value addition at each stage. The final consumer will thus bear only the GST charged by the last dealer in the supply chain with

Table III.1: Taxes subsumed under GST

Central level	State level
1. Central Excise Duty	1. State Value Added Tax
2. Duties of Excise (Medicinal and Toilet Preparations)	2. Entertainment Tax (other than the tax levied by the local bodies)
3. Additional Excise Duty	3. Central Sales Tax (levied by the Centre and collected by the States)
4. Service Tax	4. Octroi and Entry tax
5. Additional Customs Duty commonly known as Countervailing Duty	5. Purchase Tax
6. Special Additional Duty of Customs	6. Luxury tax
7. Cesses and surcharges in so far as they relate to supply of goods or services	7. Taxes on lottery, betting and gambling
	8. Taxes on advertisements
	9. State Cesses and surcharges in so far as they relate to supply of goods and service

Note: GST would apply to all goods and services (including tobacco and tobacco products), except Alcohol for human consumption. GST on five specified petroleum products (Crude, Petrol, Diesel, Aviation Turbine Fuel & Natural gas) would be applicable from a date to be recommended by the GST Council.

Source: www.cbec.gov.in

³ As per the definition under sub-clause 12A of Article 366 of the constitution, GST pertains to any tax on supply of goods or services or both except taxes on supply of alcoholic liquor for human consumption; further, services are defined to mean anything other than goods.

⁴ The Finance Minister had noted that “GST will streamline the tax administration, avoid harassment of business and result in higher revenue collection, both for the Centre and states” (Union Budget Speech, 2014-15).

Table III.2: VAT and GST

	Major Features	Present VAT	Proposed GST
1	Structure	Structure of VAT in different states differ; VAT rates also differ.	A dual tax with both Central GST and state GST will be levied on the same base. GST to have four rates.
2	Cascading effect	CENVAT and VAT have not yet been extended to include the chain of value addition and thus the benefits of a comprehensive input tax and service tax set-off remains out of the reach of manufacturers/dealers.	The introduction of GST will not only include more indirect Central taxes and integrate goods and services taxes for set-off relief, but will also capture value addition in distributive trade and a continuous chain of set-off from the original producer's and service provider's point upto the retailer's level. This would eliminate the burden of all cascading effects. Also, major Central and state taxes will get subsumed into the GST, reducing the multiplicity of taxes.
3	Coverage	Relatively narrow base and separate service tax.	Wider base and applied on both goods and services. GST is a consumption based tax which will be collected by the states where the goods or services are actually consumed.
4	Procedures for collection of tax	It varies from state to state.	Likely to be uniform throughout the country.
5	Tax Administration	Complex due to number of taxes.	Intention is to make it simple, easy and tax-payer friendly.
6	Use of Information Technology	Not much.	Completely IT-based. Its success to a great extent will depend on IT for which the goods and services tax network (GSTN) – a separate company has been formed.

Source: <http://empcom.gov.in>

set-off benefits against all previous stages. Consequently the benefits of GST are manifold

spanning across business, government and the consumer (Box III.1).

Box III.1:

What GST implies for various economic agents

(i) Business

- **Easy compliance:** a robust and comprehensive information technology (IT) platform and seamless transfer of input tax credit from one stage to another in the value chain would incentivise tax compliance.
- **Uniformity of rates and structure:** GST will ensure that tax rates and structure are common across the country, thereby increasing certainty and ease of doing business.
- **Removal of cascading:** seamless tax credits throughout the value-chain and across states would ensure minimal cascading of taxes, thus reducing hidden costs of doing business.
- **Reducing compliance cost:** The uniformity in tax rates and procedures across the country will economise on compliance cost.
- **Gain to manufacturers and exporters:** the subsuming of major taxes in GST and reduction in transaction costs

would lower the cost of locally manufactured goods and services and increase India's export competitiveness.

(ii) Government

- **Improve tax administration:** with a robust user-friendly IT system in the form of the Goods and Services Tax Network (GSTN) portal, GST would be simpler and easier to administer.
- **Higher revenue:** GST is expected to reduce the cost of collection of tax revenues and improve revenue buoyancy.

(iii) Consumer

- **Single and transparent tax:** there would be only one tax from the manufacturer to the consumer leading to greater tax transparency.
- **Relief from tax burden:** efficiency gains and prevention of leakages will benefit consumers with a reduction in the overall tax burden estimated to be around 25-30 per cent.

Table III.3: VAT/GST Rates - Select Countries

	Implementation Year	Initial Rate (per cent)
Advanced Economies		
1 Australia	2000	10.0

3. The Cross Country Experience

3.7 VAT/GST has been introduced over several decades, with France being the earliest entrant (Table III.3). Today, 160 countries have some form of VAT/GST, with the United States being a prominent absentee from this list. There are different models of VAT/GST currently in place. Singapore taxes virtually everything at a single rate, while many countries (France, Italy, UK) have multiple rates. In some countries (e.g., UK), a reduced rate on necessary items is applied with basic goods being exempted to minimize the regressive impact of the tax (Zhou, *et al*, 2013).

3.8 In most countries, introduction of the VAT/GST has been preceded by prolonged deliberations about its relative merits and

Chart III.1: VAT/GST Rates

demerits with fixing of the optimal rate being the most contentious issue (IMF, 2015b). GST rates vary widely among countries – the average VAT/GST rate in major OECD countries is higher than the rate proposed for India and those prevailing among other EMEs in 2016 (Chart III.1).

3.9 Diverse motives have been cited for the introduction of the VAT/GST, although the common element seems to be that of reforming the existing tax system and simplifying the tax structure. In this regard, a robust federal structure of government is particularly helpful for ensuring success of such reforms – Brazil, India and Canada being prominent examples. Discussion on tax reform to simplify federal and state indirect taxes is underway in Brazil with a proposal to introduce a single integrated national VAT on both goods and services. India’s plan to have central GST (CGST) and state GST (SGST) has some resemblance to the structure of the system existing in the Canadian province of Quebec where independent federal (GST)

and provincial (QST) VATs are operative simultaneously (Bird and Gendron, 1998).

3.10 A robust and fail-proof information technology (IT) framework is regarded as an essential prerequisite for the success of the GST, given the large volume of transactions involved. Besides, sensitising industry and public through information dissemination such as release of legislative documents and conducting outreach programmes/media interactions with the tax authorities are also critical. Furthermore, tax laws need to be simplified to avoid definitional issues and defray administrative costs. Drawing on lessons in the implementation experience of countries, a well-designed GST should ensure that (i) a single rate is levied on a comprehensive base (goods and services); (ii) no exemptions are given beyond standard ones; (iii) GST refunds are processed expeditiously; (iv) an adequate threshold is delineated to exclude small and micro business; and (v) initial rates are suitably calibrated to avoid disruptions to economic activity and macroeconomic stability (IMF, 2015b).

3.11 Notwithstanding the merits of GST implementation, international experience points out some likely risk relating to tax evasion and avoidance. These are (i) small businesses may not register; (ii) a trader may under-report actual sales; (iii) traders may reduce their liability by exaggerating the proportion in the lower tax slabs; (iv) tax authorities need to guard against traders who collected tax but were not remitted to the government; and (v) traders may make false claims for refunds (IMF 2015b).

3.12 It is perceived that by anchoring revenue to a more stable source, *i.e.*, consumption,

the government can have a credible plan to strengthen public finances which, in turn, would boost investor confidence in the economy and sustain growth (Zhou *et al*, 2013) especially if the introduction of the GST is supplemented by structural reforms (Bolton & Dollery, 2005; IMF, 2015b). Although the precise impact is difficult to measure accurately, average growth increased by about 0.7 percentage point following fiscal (including tax) reforms in some advanced economies (Danforth *et al*, 2015). As it promotes competitiveness, efficiency gains from GST is considered to be higher *vis-a-vis* other taxes, the benefits of which accrues to growth over the medium-term (IMF, 2006). In the short term, however, it may result in lower growth as households adjust their consumption after GST implementation. The evidence also suggests that implementation of GST may be inflationary under specific circumstances (Box III.2).

3.13 From a fiscal perspective, international evidence suggests that implementation of VAT/GST have resulted in a higher government revenue-GDP ratio over time. An earlier study concluded that the tax-GDP ratio increased significantly after VAT implementation in twelve European countries (Aaron, 1981). Moreover, OECD data on member countries from Europe suggest an increase of 37 per cent in the VAT revenues-GDP ratio between 1975 and 2006 (OECD, 2008). While an increasing VAT revenue-GDP ratio is not necessarily correlated with a rising government spending-GDP ratio, critics have argued that an indirect (less visible) VAT may support higher levels of government spending compared to the use of direct taxes (eg. income tax) which are more visible (Carroll *et al*, 2010).

Box III.2: Impact on Inflation

Cross country evidence suggests that the impact on inflation due to the introduction of a VAT/GST is not uniform. While the introduction of a VAT in UK resulted in no major impact on inflation, Canada experienced inflation pressures after introduction of the GST (Gelardi, 2014). One of the reasons which might have helped UK escape inflation pressures is that the VAT replaced a concealed consumption tax; however, this contention is not supported by evidence from Canada where the GST replaced the manufacturer's sales tax. In fact, inflation in Canada did not have any impact from the GST rate reductions of 2006 (7 to 6 per cent) and again in 2008 (to 5 per cent) which may be attributed to Canadian provinces being able to impose their own sales tax (Gelardi, 2014).

Singapore witnessed a sharp rise in inflation soon after introduction of the GST, mirroring the experience of many other countries. Malaysia was able to mitigate this risk as the price rise on account of GST was moderated by the Ministry of Domestic Trade and Consumer Affairs. Australia, and New Zealand saw one-off increases in inflation post GST implementation which normalized within a year. In Australia, GST had a significant but transitory impact on inflation with a lag of one quarter after its implementation in July 2000. During the quarter, inflation showed an average increase of 2.6 per cent which was on account of a spike in domestic consumption in the months prior to VAT/GST implementation as consumers purchased ahead of the new tax coming into effect. Domestic consumption and economic activity declined after VAT/GST implementation and resulted in the economy contracting during the first quarter of 2001, but returned to normalcy thereafter (Palil and Ibrahim, 2011).

From the British and German experiences, VAT/GST was found to be least disruptive in terms of inflation if introduced during a period of economic slowdown. In 1979, a wage-price inflation spiral afflicted the British economy after VAT/GST was raised from 11 to 15 per cent as producers increased prices beyond what was necessary to cover the additional VAT/GST. In contrast, West Germany was able to minimize the inflationary impact by introducing VAT/GST during recession in 1968. All subsequent rate increases in Germany have since been successfully effected during periods of economic slack (Palil and Ibrahim, 2011).

In the context of 17 Eurozone countries, VAT pass-through to inflation during 1999 to 2013 were found to be sensitive to the type of VAT change and significantly different between durables and non-durables due to differences in storability and other features such as the salience of tax changes. For changes in the standard rate, the final pass through was about 100 per cent, while for reduced rates it was significantly lower at around 30 per cent (Benedek *et al.*, 2015).

Select Country Experiences

(i) New Zealand

The GST was introduced in 1986 as part of a comprehensive tax and welfare reform when the economy was in crisis. Initially, GST was introduced at a rate of 10 per cent which was subsequently raised to 12.5 per cent (1989) and further to 15 per cent (2010) to mobilize higher revenue while removing distortions in the tax structure (IMF, 2015a). This eventually

led to the adoption of GST at a single rate with almost no exemptions. Most notably, food was included in the GST base at the full rate, which broad-based the tax net and also reduced both compliance and administrative costs. With a standard rate lower than in most other OECD countries but without almost any exemptions, New Zealand is one of the highest tax productive nations (highest GST revenue GDP ratio) among the OECD countries (IMF, 2015a).

(ii) *Canada*

The GST was introduced in the form of a multi-level VAT in 1991 replacing manufacturers' sales tax. GST was levied on supplies of goods or services purchased in Canada and included most products, except certain essentials such as groceries, residential rent, medical services, financial services and exports. The system of input tax credit ensures that the value added at each stage of the supply chain is taxed only once thus avoiding cascading. The introduction of GST led to new processing operations and techniques to verify the accuracy of the returns submitted by small entrepreneurs and multinational corporations (Sherman, 2009). Since some of the Canadian provinces impose their own sales tax besides the GST, it creates price distortions in the economy (IMF, 2015a).

(iii) *Singapore*

The GST was introduced in April 1994 at 3 per cent, along with a reduction of direct and other indirect taxes (Zhou, *et al*, 2013) to make it acceptable to the public and to minimize the inflation impact. Additionally, the government committed not to raise the tax for the next 5 years which was an important step in reviving consumer spending. Thereafter, rates were raised gradually, although it remains one of the lowest rate globally with favourable implications for trade competitiveness (Yin, 2003) (Table III.4). The motives for GST implementation were (i) broadening the indirect tax base; (ii) offsetting the loss in revenue as a result of the reduction in

Table III.4: GST Revision in Singapore

Period	GST (per cent)
1 April 1994 to December 2002	3
2 January 2003 to December 2003	4
3 January 2004 to June 2007	5
4 July 2007	7

Source: Zhou *et al* (2013)

direct taxes; and (iii) making the tax base more resilient in the long term in view of an aging population (Zhou, *et al*, 2013). To compensate for the regressive nature of GST, Singapore has introduced a GST compensation scheme which provides support to the needy and underprivileged.

(iv) *Australia*

Although first mooted in 1975, GST was implemented in Australia 25 years later on July 1, 2000 through the passing of the Goods and Services Tax Act, 1999 (Zhou, *et al*, 2013). Australia imposed a 10 per cent tax on goods and services and replaced a range of existing taxes – the wholesale sales tax (WST), debit tax, financial institutions duty, and stamp duty on shares, leases, mortgages and cheques. The GST is collected by the federal government and redistributed to the six states and two territories according to the amount recommended by the Commonwealth Grants Commission (CGC) on the basis of the principle of horizontal fiscal equalization (HFE). The aim is to achieve equality in the provision of services and infrastructure; however, it often causes friction between the states when the GST revenue is divided (Zhou, *et al*, 2013). The effective veto that Australian states and the commonwealth

enjoys makes any GST reform difficult to achieve (IMF, 2015a). In order to increase the acceptability of GST, Australia introduced a range of measures to soften the extra financial burden of GST. Several exemptions (*viz.*, basic foods, some education and health services, childcare, and religious and charitable activities) and low standard GST rate at 10 per cent have, however, led to low GST revenue productivity from a tax collection standpoint (IMF, 2015a).

(v) *Malaysia*

One common reason for implementation of GST in both Singapore and Malaysia is the large expatriate work force in these countries who benefit from economic growth but are exempt from income tax. Furthermore, Malaysia's shadow economy was estimated at 30 per cent which represents a vast scope for tax revenue (Zhou *et al*, 2013). Although the idea of introducing a consumption based GST has been on the table since 1989, it was introduced only in 2015 after intensive debate on its potential merits and shortcomings. Lingering doubts on the country's preparedness for the introduction of GST led to some delay in its implementation even though the standard rate (at 6 per cent) is relatively low compared to the VAT rates in other ASEAN countries. After introduction of GST, the cost of doing business in Malaysia has reduced as the tax burden has been transferred from manufacturers

to consumers. A generous list of exemptions and very low rates, however, lowers revenue productivity in terms of tax collection (IMF, 2015b).

4. The Indian Context – Overview and Status

3.14 The concept of the GST was first introduced by the report on "Reform of Domestic Trade Taxes in India: Issues and Options" (Chairman: A. Bagchi; 1994).⁵ In fact, the VAT was adopted as a stop-gap arrangement for implementation of the GST in future. In 2000, the Government initiated discussions on the GST by constituting an Empowered Committee (Chairman: Dr Asim Dasgupta) with a mandate to design the GST model and oversee the IT back-end preparedness for its rollout. The Task Force on "Implementation of the Fiscal Responsibility and Budget Management Act, 2003" (Chairman: Vijay Kelkar) noted that although the indirect tax policy has been steadily progressing in the direction of VAT since 1986, the existing system of taxation of goods and services in India still suffers from many problems and suggested the introduction of a comprehensive GST based on the VAT principle.

3.15 In the Union Budget 2006-07, a proposal was made to introduce a national level GST by April 1, 2010. Since the proposal involved reform/restructuring of indirect taxes levied by the Centre and by the states, the responsibility of preparing a design and roadmap for the implementation of GST was

⁵ The report observed "This would be possible if the modified value added tax (MODVAT) now operating through excise tax system is made into a full-fledged manufacturers VAT and the states also adopt a destination based harmonized system of VAT in place of the chaotic sales taxes operating now."

assigned to the Empowered Committee (EC) of State Finance Ministers. In April, 2008, the EC submitted a report titled “A Model and Roadmap for Goods and Services Tax (GST) in India” and the first discussion paper on GST was presented by the EC of State Finance Ministers on November 10, 2009.

3.16 The Constitution (One Hundred and Fifteenth Amendment) Bill, 2011 was introduced in the Lok Sabha to enable the levy of GST; the Bill, however, lapsed with the dissolution of the 15th Lok Sabha. Subsequently, the Constitution (One Hundred and Twenty Second Amendment) Bill, 2014 was introduced in the Lok Sabha in December 2014 and passed in May 2015, finally culminating into an Act – the Constitution (One Hundred and First Amendment) Act, 2016 which, after receiving the assent of the President of India on September 8, 2016, will come into force once the Central Government notifies through the official gazette.

3.17 In compliance with Article 279A of the Constitution, the Union Cabinet constituted the GST Council and announced the formation of the GST Council Secretariat in its meeting of September 12, 2016. The GST Council is a joint forum comprising a) the Union Finance Minister as Chairperson; b) the Union Minister of State in-charge of Revenue as Member; c) the Minister in-charge of finance or taxation or any other Minister nominated by each state government as Members⁶. In the Council, state government representatives enjoy two-third voting share while the remaining one-third is

with the Central Government; decisions are to be taken with a three-fourth majority. The Council’s mandate include recommendations on (i) the goods and services that are subjected or exempted from GST; (ii) model GST Laws; (iii) principles that govern place of supply; (iv) threshold limits for exemptions; (v) GST rates including the floor rates with bands; (vi) special rates for raising additional resources during natural calamities/disasters; and (vii) special provisions for certain states. The GST Council held 13 meetings till March 31, 2017 (Annex-I).

3.18 Keeping in mind India’s federal structure, there will be one Central goods and services tax (CGST), 31 state goods and services tax (SGST) including two Union Territories with legislatures, one Union Territory goods and services tax (UTGST) without legislature, and one integrated goods and services tax (IGST) law governing inter-state supplies of goods and services. Both the Centre and states will simultaneously levy GST across the value chain on supply of goods and services. The Centre would levy and collect CGST, while states would levy and collect SGST on all transactions within their geographical frontiers. The input tax credit under the CGST and the SGST would be available for discharging the liability on the output at each stage; however, no cross utilization of credit is permitted. The additional duty of excise/countervailing duty (CVD) and the special additional duty (SAD) currently being levied on imports will be subsumed under the GST. The IGST will be levied on all imports into the territory of India;

⁶ During the meeting, decisions were taken for (a) appointment of the Secretary (Revenue) as the *ex-officio* Secretary to the GST Council; (b) inclusion of the Chairperson, Central Board of Excise and Customs (CBEC) as a permanent invitee (non-voting) to all proceedings of the GST Council; and (c) creation of one post of Additional Secretary to the GST Council and four posts of Commissioner in the GST Council Secretariat. The GST Council Secretariat are manned by officers on deputation from both the Central and state governments.

**Box III.3:
Integrated Goods and Services Tax (IGST)**

The integrated goods and services tax (IGST) Act, 2017 applies to movements of goods and services from one state to another. It is not a separate tax but a sum of CGST and SGST. The major advantages of IGST model are (i) maintenance of uninterrupted input tax credit (ITC) chain on inter-state transactions; (ii) no upfront payment of tax or substantial blockage of funds for the inter-state seller or buyer; and (iii) no refund claim in exporting state as ITC is used up while paying the tax. It will facilitate the seamless flow of ITC across states as it is a destination based tax, *i.e.*, the IGST amount will be apportioned between the Centre and states although the power to levy and collect IGST lies with the Centre to ensure that a single coordinating agency administers it.

Collections under the IGST are to be deposited into an IGST account administered by the Central Government and will be distributed between the Central Government and the consuming states on a mutually agreed formula epitomising the spirit of cooperative federalism. The IGST will also apply to imports and exports of goods and services into/from India and any import/export of goods or services into/from Indian

territory shall be deemed to be supply of goods and services as inter-state trade or commerce.

The IGST will be governed by the Central Government under the administrative control of CBEC. Although states also want to control the IGST mechanism, the Centre is of the view that it should have sole administrative authority over IGST. By a special provision in the law, however, states can be empowered to collect IGST. In case of any dispute between states over the place of supply, the Centre will have the power to administer those assesses and collect taxes. The levy of IGST, however, can commence only after the GST law has been enacted by all the legislatures, as it would have to be synchronised through the simultaneous participation of the Centre and all the states.

states where imported goods are consumed will now gain from additional tax revenue (Box III.3).

5. Experience of Indian States with VAT

3.19 During the last decade, a major initiative on the revenue side was the introduction of VAT by state Governments over a span of four years (2003-04 to 2007-08). Concurrently, existing general sales tax laws were replaced with the VAT Act (2005) and other associated rules. While a few states opted to stay out of VAT during the initial years, all states adopted it by 2008. Among the states, Uttar Pradesh was the last state to introduce VAT in January 2008, while Haryana was the first in April 2003.

3.20 Indian states have gained revenue efficiency after the introduction of VAT although their revenue structure differ significantly – non-special category (NSC) states depending more on their own tax revenue while the special category (SC) states relying mostly on Central transfers (Chart III.2).⁷

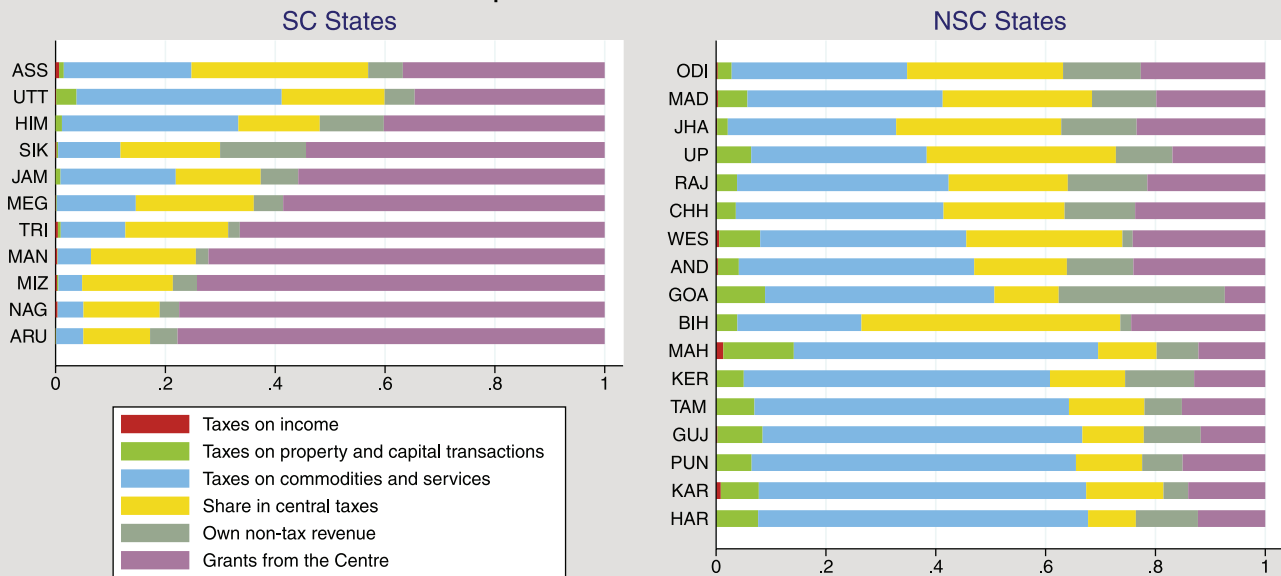

3.21 The introduction of VAT has led to significant revenue efficiency gains for the NSC states whose revenue source are primarily taxation of commodities and properties. The estimated growth and volatility efficiency frontier⁸ of their sales tax revenue after the introduction of VAT reveal that there has been a distinct migration of states from the south-west (low growth-low volatility) to the north-west quadrant (high growth-

⁷ See footnote in chapter III for list of NSC and SC states

⁸ See Cornia and Nelson (2010).

¹⁰ Volatility derived from inter-quartile range of growth rates.

growth of tax collections improved to around 15 per cent (post-VAT) from around 14 per cent (pre-VAT).

3.22 SC states, dependent mainly on grants and tax devolution from the Centre, also experienced significant efficiency gains in terms of much lower volatility after introduction of VAT despite their small bases of sales tax revenue. While the median growth in tax revenue has marginally declined (from around 19 to about 18 per cent), average volatility has declined significantly – to about 9 per cent from around 19 per cent after the introduction of VAT (Chart III.4).

Stochastic Frontier Analysis

3.23 Stochastic frontier analysis (SFA) is used to assess revenue efficiency, analogous to the production function in which the production frontier measures the maximum output (tax revenue) based on inputs (tax base

i.e., GSDP per capita and other determinants of tax revenue).

3.24 In order to study tax efficiency, two SFA models are estimated for the period 1990-91 to 2014-15 covering 17 NSC states following the standard methodology (Battese and Coelli, 1995) adapted to the Indian context (see methodology in Annex-II).¹¹ The model incorporates per capita GSDP (proxy for tax base), square of per capita GSDP (representative of non-linearity in the tax-GDP relationship), share of agriculture in GSDP (a higher share is expected to lower own tax revenue) as the factors that determine (i) own tax revenue of states as proportion of GSDP in Model 1 and (ii) taxes on commodities and services as proportion of GSDP in Model 2. The ratio of transfers to revenue receipts, aggregate expenditure to GSDP, debt-GSDP ratio and dummies for state-wise VAT implementation dates are taken as

¹¹ Model 1 and Model 2 are estimated with data for the period 1990-91 to 2012-13 and 1990-91 to 2014-15, respectively.

determinants of variation in efficiency across the states.

3.25 The estimates of the equation (see Annex-II, Table 1 and Table 2 for diagnostics) are:

Model 1

(i) *Stochastic Frontier*

$$\begin{aligned} & \ln\left(\frac{OTR * 100}{GSDP}\right)_{it} \\ &= 0.644 + 0.299 \left(\ln\frac{GSDP}{Population}\right)_{it} \\ & \quad - 0.015 \left(\ln\frac{GSDP}{Population}\right)_{it}^2 \\ & \quad - 0.058 \left(\ln\frac{Agriculture * 100}{GSDP}\right)_{it} \end{aligned}$$

(ii) *Inefficiency Equation*

$$\begin{aligned} u_{it} &= 0.189 + 0.022 \left(\frac{Central\ Transfers * 100}{Revenue\ Receipts}\right)_{it} \\ & \quad - 0.056 \left(\frac{Aggregate\ Expenditure * 100}{GSDP}\right)_{it} \\ & \quad + 0.003 \left(\frac{Debt * 100}{GSDP}\right)_{it} - 0.126 (VAT)_{it} \end{aligned}$$

Model 2

(iii) *Stochastic Frontier*

$$\begin{aligned} & \ln\left(\frac{TaxCom * 100}{GSDP}\right)_{it} \\ &= 0.670 + 0.281 \left(\ln\frac{GSDP}{Population}\right)_{it} \\ & \quad - 0.014 \left(\ln\frac{GSDP}{Population}\right)_{it}^2 \\ & \quad - 0.056 \left(\ln\frac{Agriculture * 100}{GSDP}\right)_{it} \end{aligned}$$

(iv) *Inefficiency Equation*

$$\begin{aligned} u_{it} &= 0.256 + 0.023 \left(\frac{Central\ Transfers * 100}{Revenue\ Receipts}\right)_{it} \\ & \quad - 0.062 \left(\frac{Aggregate\ Expenditure * 100}{GSDP}\right)_{it} \\ & \quad + 0.005 \left(\frac{Debt * 100}{GSDP}\right)_{it} - 0.105(VAT)_{it} \end{aligned}$$

3.26 Equation (i) and (iii) specifies the stochastic frontier production functions for Model 1 and Model 2, respectively for the i^{th} state in time period t . It represents a linearised version of the logarithmic transformation of the Cobb-Douglas production function in which per capita GSDP and share of agriculture in GSDP are taken as inputs. From equation (i) and (iii), it can be seen that one percentage point increase in per capita GSDP increases the own tax revenue-GSDP ratio by 0.3 percentage point in Model 1 and taxes on commodities and services-GSDP ratio by around 0.28 percentage point in Model 2. Similarly, one percentage point increase in the share of agriculture in GSDP reduces own tax revenue-GSDP ratio and taxes on commodities and services-GSDP ratio by about 0.6 percentage point in both Model 1 and Model 2.

3.27 As evident from the statistically significant estimates of the inefficiency equation [(ii) and (iv)], one percentage point increase in the ratio of transfers to revenue receipts leads to increase in inefficiency by 0.02 percentage point in both the models while introduction of VAT reduces inefficiency by 0.13/0.11 percentage point in Model 1/ Model 2, which is in conformity with other studies in the Indian context (Garg *et.al*, 2014).¹²

¹² A stochastic frontier of own tax revenue of 14 Indian states was earlier estimated for the period 1992-93 to 2009-10 (Garg *et.al*, 2014).

Sigma Convergence of Tax Efficiency

3.28 To ascertain whether the disparity in tax efficiency across states is declining over time, efficiency scores and the standard deviations for each state are worked out for each year. We undertake “Sigma convergence analysis” in which the standard deviation thus obtained is regressed on time (year) and the squared term of time. A positive and significant coefficient for time suggests divergence across states in tax efficiency scores, although it is increasing at a decreasing rate as given by the negative coefficient of the squared term of time. This implies that less efficient states are not catching up with the more efficient ones (Annex-II - Table 2).

3.29 The ideal GST implementation should ensure a uniform rate structure across states, reduction in compliance cost, removal of cascading, and enhance transparency in tax administration, all of which may significantly improve tax efficiency while reducing its divergence among states.

6. Concluding Observations

3.30 The macroeconomic impact of introduction of the GST could turn out to be significant in the years ahead, given the dominance of the services sector in India. Besides giving a major boost to tax revenue, the larger impact on the fiscal health would be from reduction in the administrative compliance cost. GST is likely to be supportive of fiscal consolidation without compromising capital expenditure.

3.31 Under the prevailing tax structure in India, investment is discouraged through the application of excise duties and VAT on capital goods, for which no set off or input

tax credit is provided. For example, input tax credits are not allowed for union excise duties on capital equipment acquired for non-manufacturing sectors; similarly, no credit is allowed for the state VAT on capital goods acquired by the services sector. Moreover, GST implementation is likely to boost the small and medium scale enterprises (SME) sector by (i) improving their ease of doing business; (ii) lowering logistical costs; (iii) extending outreach beyond state borders; and (iv) aiding SMEs dealing in sales and services. Furthermore, economic activity would also benefit from exports becoming more competitive as the GST regime will eliminate the cascading impact of taxes.

3.32 The Subramanian Committee (2015) assumed an elasticity of investment demand with respect to price at (-) 0.5 and an incremental capital output ratio of 4 and inferred that GST could increase investment by 2 per cent which could propel growth by an incremental 0.5 per cent although an earlier study had projected GDP growth to increase by 1.7 per cent (NCAER, 2009). A recent study, however, posits a much higher incremental growth impact of 3.1 - 4.2 per cent based on alternative scenarios of the likely aggregated GST rate due to surge in manufacturing activity and trade (Leemput and Wiencek, 2017). The implementation of the GST should also boost domestic business confidence, including among foreign investors by assuring a stable and transparent tax system, free of cascades and distortions.

3.33 As evident from the cross-country experience, one-off effects on inflation dissipated after a year of GST/VAT implementation in most countries. In this context, the short-term effects on inflation

depend upon a host of factors including the initial rate at which GST is implemented, the tax base and the efficiency of tax administration. In the Indian context, the implementation of GST is likely to have a pass-through impact lasting 12-18 months on the inflation trajectory (RBI, 2016). This would eventually be moderated by reduction in supply chain rigidities, transportation and production costs which would accrue from the creation of a unified goods and services market post-GST.

3.34 The impact of GST on CPI inflation would largely depend on the four-tier standard rate (5, 12, 18 and 28 per cent) that has been decided by the GST Council although almost 50 per cent of the CPI basket is expected to be exempted. A GST structure with a standard rate of 18 per cent and a low rate of 12 per cent (consistent with a RNR of about 15-15.5 per cent) is expected to have a minimal impact on inflation (Subramanian Committee, 2015). If the standard rate is increased, the impact on aggregate inflation

would be higher, concentrated in select groups like healthcare (excluding medicines) (RBI, 2016). As the standard rate increases to 28 per cent, the impact on CPI would further increase. The general consensus is that the impact on consumer price inflation is likely to be moderate if the standard GST rate is at 18 per cent – in fact, overall price levels may actually go down due to more efficient allocation of factors of production in the long run (NCAER, 2009).

3.35 The immediate impact of GST on government finances is deemed to be negligible given that the GST rate structure emphasises a RNR. In the medium to long term, however, GST is likely to increase the tax buoyancy of the Central and state governments by 0.6 per cent which is likely to reduce the gross fiscal deficit by 0.7-1.2 per cent of GDP if disinvestment receipts and non-tax revenues remain unchanged from the trend of the previous 5 years (CRISIL, 2014).

IV

Issues and Perspectives

GST implementation brings several issues to the fore viz., determination of the revenue neutral rate, consensus on the divisible pool of resources, sharing the benefits of cesses, the administrative edifice and the technological platform. A dispute prevention mechanism would facilitate a smooth transition to the GST. The evolution in central transfers and evolving fiscal federalism will have a key bearing on the health of state finances over the medium term.

1. Introduction

4.1 In India, taxes on goods and services levied by the Central and state/local governments are subject to different sets of rates, procedures and compliance. The existing legal framework for these indirect taxes pose several challenges, viz., (i) multiplicity of rates; (ii) cascading effect of taxes; (iii) excessive compliance/procedures; and (iv) fractured flow of import credits. A single goods and services tax (GST) is best suited to overcome these challenges.

4.2 Notwithstanding several benefits, the implementation of GST may involve several issues which have been debated in policy circles in recent years. Primary among them is the issue of the revenue neutral rate – the rate which would ensure that the migration to the proposed GST would not entail any revenue shortfall for the Centre and states from the current level. In order to achieve this goal, rates have to be appropriately set, exemplifying the true spirit of fiscal federalism in which revenues are equitably shared by the Centre and states. Nevertheless, the levy of cess by the Centre on several goods and services is a contentious issue as revenues from cesses are not shareable. For the effective implementation of GST, a comprehensive and

effective dispute resolution mechanism is necessary along with a robust technological infrastructure. Furthermore, an efficient administrative arrangement can ensure seamless coordination among all stakeholders and facilitate smooth transition to a GST regime. This chapter delves into these issues with a view to providing a narrative around the evolving legislative and policy developments relating to the GST. From a medium term policy perspective, central transfers and debt sustainability of states warrants careful scrutiny as they are going to shape the contours of state finances in the years ahead.

2. Debate on the Revenue Neutral Rate

4.3 The rationale for implementation of the GST is to reform the in-built inefficiencies in the prevalent tax structure. One of the most debated issue in GST implementation has been the appropriate level of the “revenue neutral rate (RNR)”. According to the Report on the Revenue Neutral Rate and Structure of Rates for the Goods and Services Tax (GST), (2015) (Chairman: Arvind Subramanian), “RNR refer to a single rate, which preserves revenue at desired (current) levels”¹. The RNR is different from the “Standard Rate” which is defined as the rate applicable

¹ In practice, there will be a structure of rates but for the sake of clarity it is appropriate to think of a single rate.

on goods and services whose taxation is not clearly stated². Along with other factors such as administrative simplicity, inflation neutrality, compliance friendliness and lower tax burden for the public, the RNR is an indicator of the success of the new tax system (*i.e.*, GST). Nevertheless, there is no clarity on whether a precise RNR exists (Box IV.1). This is primarily due to growth uncertainties and its impact on different industries/sectors which impinges on tax revenue.

4.4 Studies have indicated different RNRs, based on various methodology/assumptions (Table IV.1). One of the earliest studies in the Indian context concluded that if the GST is to be levied on a comprehensive base, the combined Centre-state revenue-neutral rate (RNR) need not be more than 12 per cent (Poddar and Bagchi, 2007). This rate would apply to all goods and services with the exception of motor fuels, which would continue to attract a supplementary levy to maintain

**Box IV.1:
Can there be an Optimal Rate for Taxing Commodities**

The issue of the ideal or the optimal way to tax commodities has been of keen interest among economists for a long time. In the early half of the twentieth century, a Cambridge mathematical economist posed the following problem: suppose a government has a target amount of tax revenues to mobilise and that it can only tax commodities. In this situation, what is the optimal design of the tax structure? The solution is that commodity taxes on all the goods should be set in a manner such that there is a proportional drop in demand along the compensated demand curve for each of the commodities (Ramsey, 1927).

Does this imply proportional taxation? Not ordinarily, although it can be shown that uniform or proportional taxation would hold if either of the following conditions prevails: (i) preferences are homothetic and the utility function is separable between consumption and labor; and (ii) labor supply is completely inelastic (Sandmo, 1976). From a policy perspective, the issue of uniformity of commodity taxes has been a matter of substantial and special interest. The theoretical justification for uniform commodity taxes in the form of VAT must ultimately be traced to some restriction on consumer preferences or the formal properties of the labor supply function.

In a more general treatment of the optimal tax problem incorporating optimum income and commodity taxes, there is a realisation that there are limits to the redistributive powers of indirect or commodity taxes and the overall result seems to be that commodity taxes may be set at uniform

rates and any correction for vertical equity or distributive justice ought to be achieved via making direct taxes (income tax) suitably progressive (Atkinson and Stiglitz, 1980; Nygard and Revesz, 2017).

In the Indian context, the debate on RNR has highlighted a serious concern about the revenue mobilisation capacity of the proposed GST which has to yield more than the combined revenue of the present Central excise and all the state level sales taxes. Any major shortfall would cause a serious dent on the public finances of both the Centre and states; therefore, the projected GST rate/rates have to be suitably calibrated. In this regard, the GST Council has settled for a 4-tier structure set at 5, 12, 18 and 28 per cent which would reflect purely revenue concerns. It, perhaps, is also indicative that there can be no single optimal rate for taxing commodities.

² The Subramanian Committee (2015) had discussed about three approaches to arrive at RNR – the macro, indirect tax turnover (ITT) and the direct tax turnover approaches.

Table IV.1: Revenue Neutral Rate

Study	Suggested RNR
1 Poddar and Bagchi (2007)	Not more than 12 per cent
2 Rao (2008)	10-14 per cent
3 Task Force on GST: Thirteenth Finance Commission (2009)	11 per cent
4 The Report on the Revenue Neutral Rate and Structure of Rates for the Goods and Services Tax (2015)	15-15.5 per cent

Note: RNR given in the table are not comparable due to differences in methodology and approach.

the total revenue yield at their current levels. A study based on 2003-04 all-India input-output matrices undertook two approaches to arrive at GST rates; *i.e.*, GDP-based estimates and a private final consumption-based approach (Rao, 2008). On the former basis, a 10 per cent GST rate was estimated as adequate to raise the revenues required to replace central value added tax (CENVAT) and service tax at the central level, and sales tax, passenger and goods tax, electricity duty and entertainment tax at the state level. Based on the latter approach, the required GST rate was estimated at about 14 per cent³. The study concluded that improvement in the tax regime and tax administration would ensure the same revenues through a lower GST rate (Rao, 2008).

4.5 The report of the Task Force on Goods and Services Tax (2009), (Chairman: Arbind Modi), which was set up by the Thirteenth Finance Commission (FC-XIII), estimated RNR to be 11 per cent exclusive of revenue gains from increased tax compliance and higher GDP. In actual practice, therefore, the RNR of 11 per cent is not revenue neutral – it may actually increase total revenue.

The report also recommended that formula-based devolution (based on State Finance Commission recommendations) of an amount equivalent to collection of state GST (SGST) at 2 percentage points should be made to the local bodies such as municipal corporations (as GST will lead to abolition of all entry and octroi taxes by state and other sub-national governments).

4.6 The Subramanian Committee (2015), cautioned that it is difficult to posit one single number as the appropriate rate with any degree of confidence. Therefore, it recommended that the RNR be in a range of 15 to 15.5 per cent, with a strong preference for the lower end of the range. Even so, it will still place India at relatively higher than many of its emerging market peers – a higher rate implying greater regressivity. Countries that have well-developed social safety nets can better offset this regressivity. It is argued that a higher rate in the initial stages of implementation may reduce tax compliance and increase dissatisfaction, besides being inflationary. Accordingly, a lower rate will be more prudent in terms of wider acceptability, ensuring better tax compliance.

³ Along with this rate, 10 per cent non-rebatable excises on passenger cars and multi-utility vehicles, petroleum products and tobacco products, would help in realising the revenue target.

4.7 A related issue is the revenue potential of the Centre and its capability to provide adequate compensation to the states. If revenues fall short and the fiscal position of both the Centre and states are affected, the Centre runs the risk of having to compensate the states which would be an additional burden on Central finances. Furthermore, multiple rates may be a problem as low rates on some goods have to be balanced through higher rates on other goods to ensure overall revenue neutrality; this will enhance the scope of tax evasion, besides posing administrative difficulties. The GST Council has settled for a four-tier structure in the range of 5-28 per cent based on revenue considerations which is broadly consistent with the RNR of 15-15.5 per cent. Although the details of commodities in each tax bracket is yet to be decided by the GST Council, it is expected that food and other necessary items would be taxed at the lowest rate with some of them being exempted fully. This would minimise the regressive burden of the tax.

3. Dispute Resolution Mechanism and IT Infrastructure

4.8 Tax disputes often arise due to differences in the interpretation of the taxation law by the tax imposing authority and the tax payers. Hence, all efforts should be made to simplify tax laws to avoid ambiguity ensuring effective and timely settlement through a dispute resolution mechanism – a prerequisite for the overall efficiency of tax administration and a conducive business environment. Under the GST, multiple parties such as

the Centre, states, and tax payers would be involved and the possibility of such disputes arising cannot be ignored. Disagreement may arise at several levels – between the Centre and states; between states; and between tax payers and tax authorities – regarding (i) the need of filing appeals at two places under GST (at the state level for SGST and at the Centre for CGST); and (ii) where to file appeal – in the state in which production occurs or where they are consumed (Joshi *et al*, 2016).

4.9 Initially, states were apprehensive that the GST dispute settlement authority (previously proposed under article 279B) would circumscribe the fiscal powers of the Centre and states. Hence, this provision has been done away with and a new provision has been made in Article 279A itself, empowering the GST Council to decide about the modalities of dispute resolution⁴. The GST Council may decide modalities of the redressal mechanism; for example, a retired judge could oversee the resolution panel for legal issues, while other experts could be considered for non-legal issues. The GST Council would take decisions through a three-fourth majority – the Centre will have one-third voting rights while the states will have the remaining two-third, based on a formula under which no party is in a disadvantageous position. Transparency in rules and procedures, easy availability of information, and cooperation among the relevant parties may help in dispute prevention even as outreach by tax authorities and guidance in filing returns may go a long way in minimising cases of disputes. This would

⁴ Report of the Select Committee on the Constitution (One Hundred and Twenty-Second Amendment) Bill, 2014, Parliament of India.

**Box IV.2:
Goods and Services Tax Network (GSTN)**

In view of the sensitivity of information at the disposal of GSTN, the Empowered Group recommended that the Government retains strategic control over GSTN through measures such as (i) control over the composition of the Board; (ii) mechanisms of special resolution and shareholders agreement; (iii) induction of Government officers on deputation; and (iv) agreements between GSTN and governments. The shareholding pattern would ensure that the Centre (individually) and states (collectively) are the largest stakeholders at 24.5 per cent each. Together, the Government shareholding at 49 per cent would far exceed that of any single private institution. After roll out of the GST, the revenue model of GSTN would consist of user charge to be paid by all stakeholders. Thus, it is envisaged to be a self-sustaining and financially viable entity.

The common GST portal developed by GSTN will function as the front-end of the overall GST IT eco-system. The IT systems of central board of excise and customs (CBEC) and state tax departments will function as the back-office that would handle tax administration functions such as

registration approval, assessment, audit, and adjudication. A common and shared IT infrastructure for taxpayers will handle registration applications, filing of returns, creation of challans for tax payment, settlement of IGST payments (like a clearing house) and generation of business intelligence and analytics. In this regard, about 70 per cent of the existing registrants have already migrated to the GSTN system.

GSTN has selected 34 IT, IT enabled services and financial technology companies, to be called GST Suvidha Providers (GSPs), who would develop applications for taxpayers interacting with the GSTN. In this context, the GST portal will prepare a summary of all payment confirmations received by it from banks every day and share the same with the RBI and accounting authorities for reconciliation. No tax money will come to GSTN; it will only get confirmation of payment from banks.

minimise recourse to dispute settlement procedures.

4.10 The success of GST and effective dispute prevention depends on creation of a sound information technology (IT) infrastructure. In this regard, the goods and services tax network (GSTN) – a non-government private limited company – has been set up under erstwhile Section 25 of the Companies Act, 1956 primarily to establish a uniform interface for the tax payer through a common and shared IT infrastructure between the Centre and states that enables processing and exchange of information amongst all stakeholders, viz., tax payers, Central and state governments, accounting offices, banks and the RBI (Box IV.2). In this regard, GSTN would be developing back-end IT modules for states who have opted for it .

4. Administrative Control of GST

4.11 After implementation of GST, there will be one CGST law, 31 SGST laws for each of the states including two Union Territories with legislature, one UTGST for Union Territories without legislature and one IGST law governing inter-state supplies of goods and services. CGST, UTGST and IGST will be administered by the Centre, while the SGST will be managed by the respective state governments. Both Centre and states will simultaneously levy GST across goods and services. CGST and IGST will be administered by the Central Board of Excise and Customs (CBEC) and the SGST will be administered by the State Commercial Tax Departments of the respective state governments. Furthermore, after enactment of GST, the apex indirect tax body CBEC will be re-named as the Central Board of Indirect Tax and Customs (CBIC)

which will implement the rules, including exemptions and threshold, to be set by the GST Council.

4.12 The dual GST is proposed in view of the federal structure in India defining taxation jurisdiction of the Centre and states. In order to address the issue of dual control over assesseees, the GST Council has approved the division of audit and assessment responsibility between the Central and state governments. State authorities would control 90 per cent of the assesseees with annual turnover of less than ₹1.5 crore, while the Centre will control the remaining 10 per cent. Assesseees with a turnover above ₹1.5 crore will be administratively controlled by the Centre and states in equal measure. It has been opined, however, that there should be an option to divide the entire tax base vertically wherein the taxpayers are divided between the Centre and the states in a fixed proportion.

4.13 The fitment of goods and services in the various agreed slab rates is an important issue. In this regard, the GST Council has decided on a four-slab structure, as mentioned earlier, along with a cess on luxury and 'sin' goods such as tobacco. States have been given the powers to levy tax on economic activity within 12 nautical miles of coastal territory. It is proposed to have a common registration and common portal for filing of returns for Central and state tax administrations.

4.14 In order to ensure rollout of the GST on the scheduled timeline of July 1, 2017, the GST Council is actively engaged in resolving administrative and structural issues. On April 06, 2017, the Parliament passed four

supplementary GST laws *viz.* the Central Goods and Services Tax Bill (CGST), the Integrated Goods and Services Tax Bill (IGST), the Goods and Services Tax (Compensation to States) Bill and the Union Territory Goods and Services Tax Bill (UTGST). These will now be presented before the President for his consent following which all states will pass another legislation *viz.* the State Goods and Services Tax Bill (SGST). As on May 01, 2017, 5 states *viz.* Telangana, Bihar, Rajasthan, Jharkhand and Chhattisgarh have passed their SGST Act with other states expected to follow shortly.

5. Fiscal Federalism and GST

4.15 Fiscal federalism deals with the division of governmental functions and financial relations among various levels of government within a federal structure (Musgrave, 1959). As a subfield of public economics, fiscal federalism is concerned with understanding which functions and instruments are best centralised and which are best placed in the sphere of decentralised levels of government (Oates, 1999). From an operational perspective, it consists of the division of responsibilities in respect of taxation and public expenditure between the Centre and state governments. In a federal setup, fiscal transfers are effected through tax devolutions and grants, often supplemented by loans from the Centre to the states. In line with the practice followed in other countries with federal structures, fiscal transfers in India are guided by the principle of 'equalisation', which neutralises insufficiency in fiscal capacity (but not revenue effort) across states. Therefore, the objective of fiscal transfers is to correct vertical and horizontal imbalances (Rao and Singh, 2005) – the former referring to the simultaneous imbalance

between means and responsibilities in two different tiers of governments because states bear expenditure responsibilities disproportionate to their sources of revenue (Rangarajan and Srivastava, 2011); and the latter pertaining to differences in resource capabilities/uniformities between states.

4.16 Under the current system of transfers in India, tax devolution plays a dual role of correcting vertical as well as horizontal imbalances while grants-in-aid are primarily targeted towards achieving a degree of equalisation among states. In recognition of problems relating to vertical and horizontal imbalances, the Constitution of India has made several provisions to bridge the resource gap between the Centre and the states. They include Article 268, which facilitates levy of duties by the Centre but equips the states to collect and retain the same. Similarly, Articles 269, 270, 275, 282 and 293 define ways and means of sharing resources between the Centre and states. Apart from the above-mentioned provisions, Article 280 provides an institutional framework to facilitate Centre-state transfers in the form of Finance Commissions (FC) which determines the share of states in tax revenues of the Centre. FC recommendations are required to address the vertical imbalance between the Centre and state governments as well as the horizontal imbalance among states. There are other constitutional and institutional arrangements for transfer of resources from the Centre to states such as through the budget and making

provisions for fiscal transfers and borrowings to strengthen Centre-state financial relations.

4.17 Regarding financial relations between the Centre and states, the Seventh Schedule (Article 246) of the Indian Constitution lays down the respective fiscal powers and functional responsibilities following the principles of federal finance under three categories *viz.*, the Union List, the State List and the Concurrent List.⁵ The concurrent list is the one in which both the Centre and states can make legislations; however, federal laws prevail in case of a conflict or tie.

4.18 The Centre has been given exclusive powers to levy taxes and collect revenue which are divided between the Centre and states. State governments have freedom to decide the amount of taxation which are levied, collected and retained by them although the tax rates tend to differ among states. The major taxes which state governments can levy and collect revenue are Sales Tax/VAT, entry tax/octroi duty, stamp duties and registration fees, profession tax, land revenue, agricultural income tax (see Chapter III) and the like.

Impact of GST

4.19 The GST is drawing out a new course for fiscal federalism in India focusing on cooperation. After its enactment, tax powers may overlap and the Centre and states will have to agree on GST rates. The GST will subsume taxes levied by the Centre, states and local bodies; therefore, the fiscal capability of local bodies may be affected after implementation of GST.

⁵ The Union List contains items of national importance (eg. defence, railway *etc.*), the State List contains items of state and local interest (eg. public health, agriculture *etc.*) while the Concurrent List contains items having mutual jurisdiction of the Centre and states on areas on mutual interest (eg. education, forest *etc.*).

4.20 The state of vertical imbalances would depend on the pattern and the rate of the GST that will be put in place under the dual rate regime. Therefore, the GST rates should be determined taking into account the present level of revenues of the two-tiered tax structure so as to ensure that the fiscal imbalance does not increase (Rangarajan and Srivastava, 2011).

4.21 In the context of varying rates of taxes across states, the GST endeavours to simplify the tax regime. To the extent, however, that it leads to disagreement between states and between the Centre and the states, it may defeat the spirit of fiscal federalism. Moreover, any single state may have to go with the collective decision even if it is in disagreement with the views of the Council.

4.22 It has been argued on the one hand that GST would lead to loss of fiscal autonomy for states as it would curb their ability to alter tax rates. States would forfeit their right to levy new taxes, or change the existing tax rate or give exemptions to any class of goods or services. On the other hand, with well-defined areas for the application of Central GST (CGST), State GST (SGST) and integrated GST (IGST) to avoid conflict and given the proposed dual-tier structure, the GST is expected to promote cooperative federalism while reducing competitive federalism. Both Parliament and state assemblies have power to make laws on taxation of goods and services, while the GST Council will settle inter-state or Centre-state disputes by consensus. Furthermore, states are free to levy VAT on sale of petroleum and crude products until a decision is taken by the GST Council.

The assignment of concurrent jurisdiction to the Centre and the states for the levy of the GST would, therefore, require an institutional mechanism that would ensure joint decisions about the structure, design and operation.

6. Central Transfers to States

4.23 In a federal structure, a widely debated issue is the transfer of resources from Centre to states. Vertical and horizontal imbalances are common features of a federal structure and India is no exception. Central Government transfers have played a significant role in bridging the resource gap between states expenditure commitments and their own resources for funding such expenditure. Although both own revenue and central transfers to states have increased in the past few years, the increase has been significant in the case of the latter (Table IV.2).⁶

4.24 States have been seeking an increase in the share of central taxes citing a number of reasons *viz.*, (i) reduction in the size of the divisible pool due to increase in the scope of cesses and surcharges; (ii) declining shares

Table IV.2 : Share of Revenue of State Governments

(per cent to GDP)

	Own Revenue	Central Transfers	Total
1	2	3	(4 =2+3)
2010-11	7.1	4.9	12.0
2011-12	7.5	5.1	12.6
2012-13	7.8	4.8	12.6
2013-14	7.5	4.7	12.2
2014-15	7.4	5.4	12.8
2015-16 (RE)	7.7	6.6	14.3
2016-17 (BE)	8.0	7.0	15.0

Note: 1. Own revenue includes own tax revenue and own non-tax revenue.
2. Central transfers includes share in central taxes and grants.

⁶ Central Government transfers to states comprise of tax devolution and grants.

of state plan outlays; and (iii) increasing expenditure needs of states in areas such as infrastructure development, social and human development, environmental protection and pay revisions.⁷ The FC-XIV attempted to address these issues and made major recommendations in the area of Centre-state transfers. In order to improve the vertical distribution, the Commission recommended a compositional shift in transfers from grants to tax devolution to meet the twin objectives of increasing the flow of unconditional transfers to the states and yet leave appropriate fiscal space for the Union. While the share of tax devolution has increased from 32 per cent to 42 per cent of the divisible pool, sector-specific Finance Commission grants are dispensed with.

4.25 The FC-XIV has also dealt with inter-state devolution to mitigate the impact of the differences in fiscal capacity and cost disability among states through horizontal distribution. It has removed the distinction between non-special category and special category states and assigned weights to different indicators, viz., population (17.5 per cent); income distance (50.0 per cent); area (15.0 per cent); the newly introduced criteria of demographic change (10 per cent); and forest cover (7.5 per cent). It recommended post-devolution revenue deficit grants for states where devolution alone could not cover the assessed gap.

4.26 The Union Budget 2015-16 has implemented some of the major recommendations of FC-XIV, viz, (i) increasing

the states' share in tax devolution of the divisible pool, as stated earlier, thereby increasing the flow of unconditional transfers to states; and (ii) modifying the Centre-state funding pattern of some of the centrally sponsored schemes (CSS), in view of the larger tax devolution to the states. The CSS have been recently grouped into three categories viz., (i) schemes which will be fully supported by the Centre, (ii) schemes which will run with changed sharing pattern, and (iii) schemes which will be delinked. These changes have resulted in a major shift in Centre-state financing pattern.

Recent Trends in Central Transfer to States

4.27 Central transfers, which have been declining since 2011-12, increased sharply in 2014-15. This change, both in magnitude and direction, needs to be seen from the perspective of two policy changes which affected the transfer of resources to states. *First*, transfer of funds under CSS prior to 2014-15 was effected through the dual mode of a) state budgets; and b) direct transfer to district rural development agencies and independent societies. In this regard, state governments had expressed their concern that direct transfers to the implementing agencies circumvented state budgets, thereby diluting the responsibilities of the states in ensuring proper utilisation of funds. To address this issue, the entire financial assistance to the states for CSS is routed through the consolidated funds of the states since 2014-15 under the category 'central assistance to state/union territory (UT) plans' (RBI, 2015). As a result, the consolidated funds of states

⁷ The ratio of net additional expenditure on account of pay revision between the Centre and states is 1:1.49 indicating higher net additional liability on account of pay revision for states (FC XIII).

has recorded a significant increase in central transfers. Second, the increase in states' share in the divisible pool of taxes to 42 per cent from 2015-16 onwards has changed the composition of central transfers in favour of statutory transfers, as against discretionary transfers made earlier. It has also led to greater predictability and certainty in the quantum of funds being transferred to the states. The transition to GST may further change the landscape of central transfers to states. In this regard, the proposed compensation clause for revenue losses on account of introduction of GST may add an element of certainty to state governments' revenue.

7. Implications of Special Levies

4.28 Over the years, there has been a proliferation of special levies – generally used to finance specific programmes for a finite time period – viz., cess, surcharge and other additional/special duties that the Central Government has resorted to within the ambit of additional revenue mobilisation (ARM) measures. Consequently the amount of tax revenue raised by the Central Government

through special levies has increased sharply in the recent period. The share of special levies in the Central Government's gross tax revenue (GTR) has increased rapidly from 8.8 per cent in 2012-13 to 15.2 per cent in 2016-17, mainly reflecting the impact of the imposition of two new cesses, viz., *Swachh Bharat* cess and *Krishi Kalyan* cess in the Union Budget of 2015-16 and 2016-17, respectively.

4.29 At present, the Central Government imposes more than 20 cesses but it mobilises the maximum revenue through additional duty on excise on motor spirit and high speed diesel – popularly known as the road cess – which is used for development and maintenance of national highways/other roads and railway crossings. In addition, there are a number of other cesses imposed on excise duty on crude oil, *bidi*, sugar, automobiles, coal, salt, rubber, mica, iron ore, lime stone and dolomite, research and development and the like. Overall, the share of cess in the Central Government's gross tax revenue (GTR) has increased from 6.7 per cent in 2013-14 to 10.8 per cent in 2016-17 (Table IV.3).

4.30 Besides cess, the Centre has imposed a surcharge of 10 per cent on tax payable for individual assesseees in the ₹ 50 lakh-1 crore income bracket in the Union Budget 2017-18 while continuing with the existing surcharge of 15 per cent on assesseees with income higher than ₹ 1 crore, and a surcharge ranging between 2 per cent and 12 per cent on companies with total income of more than ₹ 1 crore. The share of surcharge in the Central Government's GTR has increased from 2.5 per cent in 2013-14 to 4.4 per cent in 2016-17 (Table IV.4).

Implications for States

4.31 Despite increasing use of special levies, the benefits do not percolate down to

state governments as special levies are not part of the divisible pool of taxes. Thus, the total divisible tax pool for states (as proportion to total tax revenue) has actually shrunk. Consequently, despite a sharp jump in the share of states in the divisible pool of resources from 32 per cent to 42 per cent from 2015-16 following the FC-XIV recommendations, the states' share in the Centre's GTR has *de facto* increased from 27.1 per cent in 2014-15 to 34.8 per cent in 2015-16 (Table IV.5).

4.32 In effect, such levies bring back the issue of vertical fiscal imbalance. While the Centre continues to get the larger share of revenues, the states make the bulk of disbursements, which is essentially contrary to the spirit of cooperative federalism. Although the Centre

Source: Union Budget, several issues.

has been claiming that the enhanced share of states in tax revenues will allow them greater fiscal space even at the cost of lower revenue to support its own programmes and schemes, this has been sought to be offset by increasing the reliance on cesses and surcharges. It has simultaneously reduced the fiscal space for states by curtailing the total central assistance for state plans. Over the years, states have naturally been arguing against cesses, suggesting that either they be completely eliminated or, if continued beyond a specified period, should form a part of the divisible pool.

Implications for GST

4.33 The GST Council has finalised a four-tier GST structure. While the GST Council has decided that all the existing cesses would be subsumed under the GST except the clean energy cess levied on coal, it proposes to levy a cess on ultra-luxury goods (*viz.*, high end cars) and demerit goods (*viz.*, tobacco, pan masala, aerated drinks). Accordingly, luxury and de-merit goods will attract tax at 28 per cent as well as a cess. The GST Council has capped the proposed cess on aerated drinks and luxury automobiles at 15 per cent, pan masala at 135 per cent and cigarettes at 290 per cent. The cess would be used to create a Compensation Fund to help the states that sustain any loss of revenue due to introduction of the GST. In particular, states will be given full compensation for any shortfall in revenue on the basis of a formula that entails a secular revenue growth of 14 per cent for tax revenue of states (with 2015-16 as the base year) over the five years of compensation period. The cess will have a sunset clause of 5 years. It

will be reviewed on a yearly basis and any surplus in the Fund will be distributed among the states. The GST Council will review the taxation structure once the cess is withdrawn.

4.34 Since most of the cesses will be subsumed into the GST, it will increase the size of the divisible pool of resources to the advantage of the states. Introduction of a new cess on luxury and demerit goods may be contrary to the spirit of the GST but the proceeds would be used to compensate the states; thus, the impact of GST would be beneficial overall. Nonetheless, from the point of view of implementation, it could be argued that GST is imposed on consumption while cess, which is typically applied at the stage of manufacturing, may be difficult to administer and could also lead to cascading effects.

8. Concluding Observations

4.35 The implementation of GST would be the single most important tax reform undertaken since the onset of economic reforms with far reaching fiscal consequences for the federal structure of the Indian government. In this regard, the key issue is the determination of the revenue neutral rate which would ensure that the Centre and states would not incur any loss of revenue post-GST implementation. While states are expected to forego fiscal autonomy in the levying of new taxes, changing the existing tax rate or giving tax exemptions with the implementation of the GST, it is expected to promote cooperative federalism and reduce competitive federalism.

4.36 Nevertheless, the amount of tax revenue raised by the Central Government in the recent period through special levies, the benefits of which are not shared with state governments, brings to the fore the issue of vertical fiscal

imbalance. In the way ahead, thorny issues on implementation are sought to be addressed through a robust dispute resolution mechanism while GSTN would provide the necessary IT infrastructure to all stakeholders. Finally, the administrative arrangements of GST rollout have to be seamlessly coordinated among all stakeholders. From a medium-term perspective, greater devolution of resources

to states would provide the flexibility to priorities their expenditure in sync with their development objectives. In this regard, the shift towards statutory transfers have led to an increase in untied funds at the disposal of states. Prudent choices of policies in public finances will help the states in realising their developmental objectives and would also keep them solvent over the medium term.

V

Way Forward

5.1 The fiscal position of state governments in India improved significantly since 2004-05 after the implementation of fiscal rules through the enactment of Fiscal Responsibility and Budget Management (FRBM) Acts / Fiscal Responsibility Legislations (FRLs) and introduction of debt and interest relief measures by the Central Government. These initiatives were also supported by a favourable macroeconomic environment following the high growth phase and a reversal of the interest rate cycle in the mid-2000s.

5.2 In the recent period, particularly during the last couple of years, signs of fiscal stress have re-emerged on the back of poor performance of state public sector enterprises (SPSEs). The recent initiative by several state governments of assuming additional debt liabilities as part of financial and operational restructuring of state power distribution companies (through issuance of UDAY bonds) has led to deterioration in fiscal health of states. This has been reflected in the worsening of key fiscal indicators. It is expected that states will take necessary steps to renew their efforts towards fiscal consolidation and reduce their liabilities.

5.3 The Central Government accepted the recommendations of the Fourteenth Finance Commission (FC-XIV) to increase the states' share in the divisible pool of taxes to 42 per cent (earlier 32 per cent) from 2015-16

onwards. This did lead to greater predictability and certainty in the quantum of funds being transferred to the states; additionally, there has been an overall increase in untied funds. As a result, the share of states in central taxes increased by 1.1 percentage points of GDP in 2015-16 (RE) over the previous year. The increasing use of special levies (*viz.*, cess, surcharge and other additional/special duties) by the Central Government, however, resulted in a reduction in the divisible pool of taxes as these levies are not shared with state governments, although they did boost the Central Government's tax revenue. As a result, despite increase in the share of states in the divisible pool of resources from 2015-16 by 10 per cent following the FC-XIV's recommendation, the states' share in Centre's gross tax revenue has *de facto* increased by only 7.7 per cent – from 27.1 per cent in 2014-15 to 34.8 per cent in 2015-16. It is expected that most of the cesses will be subsumed in the GST, which will increase the size of the divisible pool of resources to the advantage of the states.

5.4 While conventional debt sustainability analysis reveals that state governments' debt is sustainable in the long run, several related developments which have a bearing on the debt/fiscal sustainability of states over the medium term need to be taken into account for a balanced assessment. First, the guarantee commitments of state governments in respect

of SPSEs have recently emerged as a major source of potential risk to debt sustainability. Unbridled growth in these guarantees constitutes a major fiscal risk given the SPSEs large outstanding debt and losses (particularly those in the power sector) (IMF, 2016; Kaur *et al.*, 2014). Second, the interest liabilities of states that have participated in financial restructuring of DISCOMs (through UDAY) would increase, going forward. Moreover, additional provisions are required to be made by the state governments for extending financial support to these utilities in case they continue to incur losses in future. Third, the committed liabilities of states may increase in case they decide to implement the recommendations of their own pay commissions in 2017-18. Since their own tax revenue is inadequate to finance the additional burden, states may take recourse to market borrowing for additional funds, with implications for debt sustainability. Fourth, many states (particularly the fiscally prudent ones), which were earlier refraining from seeking additional funds through market borrowing, may now borrow as per the criteria of additional borrowing indicated by the FC-XIV.

5.5 Yet another dimension is the *ad hoc* nature of various types of loan waivers announced from time to time by state governments. Such initiatives could add to their fiscal burden and affect their finances over the medium term. While these loan waivers could alleviate the immediate debt burden of financially distressed farmers, it is essentially a transfer from tax payers to borrowers with an adverse bearing on the fiscal viability of states. Moreover, it impacts credit discipline, vitiates credit culture and dis-

incentivises borrowers from repayment, thus engendering moral hazard with expectations of future bailouts. Furthermore, if overall government borrowings increase, as is likely due to issuance of debt relief bonds by state governments, yields on state development loans (SDL) may firm up posing a higher interest burden in the future. Concomitantly, it can also crowd out private borrowers, given the finite pool of investible resources in the economy.

5.6 The consolidated GFD-GSDP ratio of 25 states is budgeted at 2.6 per cent for 2017-18, lower than the Central Government's budgeted gross fiscal deficit to GDP ratio at 3.2 per cent. Even as the Central Government makes significant efforts toward fiscal consolidation, the accumulation of liabilities could result in higher debt burden of the states unless immediate steps are taken to contain them. A rising general government debt-GDP ratio is also detrimental from a sovereign rating perspective. The recently released FRBM Review Committee Report, 2017 (Chairman: N. K. Singh) has recommended that a sustainable debt path must be the principle macro-economic anchor of fiscal policy, consisting of 40 per cent of debt-GDP ratio for the Central Government and 20 per cent for state governments by 2022-23. The states will have to considerably tighten their finances to reach this benchmark, given that their outstanding liabilities to GDP ratio stood at 23.9 per cent at end-March 2017.

5.7 In this context, introduction of the GST is expected to have significant macroeconomic implications in terms of growth, inflation, export competitiveness and the fiscal balance in the years ahead.

The successful implementation of GST will result in additional revenue through simpler and easier tax administration, supported by robust and user-friendly IT systems. The GST is expected to reduce administrative costs for collection of tax revenue and improve revenue efficiency. Moreover, uniformity in tax rates and procedures across the country will economise on compliance cost. It will also lead to increase

in the shareable pool of resources, resulting in larger central transfer to the states which, in turn, will enable them to undertake much needed developmental expenditure. Such an outcome would ensure debt sustainability for states in the long term. In fact, the GST is likely to set a new course for cooperative federalism in India by strengthening Centre-state partnership.

Annex-I: GST Council Meeting and Major Decisions – Timeline

Date	Event	Major Decisions
September 15, 2016	Constitution of the GST Council	<ul style="list-style-type: none"> • The President of India constituted the “GST Council” vide F. No. 31011/09/2015-SO (ST) dated 15th September, 2016. • GST Council can hold meetings and take decisions on various major issues such as Model law, rate of taxes, exemptions <i>etc.</i>
September 16, 2016	Enactment of GST Amendment Act.	<ul style="list-style-type: none"> • All sections of Constitution (One Hundred and First Amendment) Act, 2016 came into force vide Ministry of Finance’ Notification No. S.O. 2986(E) dated September 16, 2016.
September 22, 2016	First Meeting of GST Council	<ul style="list-style-type: none"> • Threshold exemption limit decided at ₹ 10 Lakhs for North-Eastern States and ₹ 20 Lakhs for the rest of India. • States will have sole jurisdiction over assesseees having a turnover of ₹ 1.5 crore or less. The existing service tax assesseees will continue to be under jurisdiction of Centre. • The Centre will pay quarterly or bi-monthly compensation to States, in case of any revenue loss. • Decided 2015-16 as the base year for calculating the compensation.
September 30, 2016	Second Meeting	<ul style="list-style-type: none"> • The GST Council finalised five subordinate legislations relating to payment, returns, refunds, invoice and registration. • Consensus on area-based exemption in accordance with those granted under the current excise regime. • Taxes will have to be collected and it can be reimbursed from the annual budgets to the exempted categories. • To compensate States for 5 years for loss of revenue due to implementation of GST, the base year for the revenue of the State would be 2015-16 and a fixed growth rate of 14 per cent will be applied to it

Annex-I: GST Council Meeting and Major Decisions – Timeline (Contd.)

Date	Event	Major Decisions
October 19, 2016	Third Meeting	<ul style="list-style-type: none"> • Proposed a four-tier rate structure comprising a lower rate of 6 per cent, two standard rates of 12 per cent and 18 per cent and a higher rate of 26 per cent with an additional cess for luxury and demerit goods. • Cess was proposed to be used for payment of compensation to the States. However, consensus could not be reached.
November 3, 2016	Fourth Meeting	<ul style="list-style-type: none"> • Decided a four-tier GST rate structure of 5 per cent, 12 per cent, 18 per cent and 28 per cent. • Essential items including food will be taxed at zero rate. • The lowest rate of 5 per cent would be for common use items. • 12 per cent and 18 per cent would be the standard rates. • The highest rate would apply to luxury and de-merit goods, which will also attract an additional cess. • The collection from this cess as well as clean energy cess will be used for compensating states for any loss of revenue during the first five years of implementation of GST.
December 2-3, 2016	Fifth Meeting	<ul style="list-style-type: none"> • Consensus could not be reached on the issue of sharing of administrative powers between the centre and the states.
December 11, 2016	Sixth Meeting	<ul style="list-style-type: none"> • The Council discussed on the Model CGST and SGST legislation (Model GST Law) which was released in the public domain on November 26, 2016. • Could not reach consensus on issue of dual control of assesses.
December 22-23, 2016	Seventh Meeting	<ul style="list-style-type: none"> • Draft CGST and SGST Law were cleared along with compensation law. • No consensus was reached on issue of dual control.

Annex-I: GST Council Meeting and Major Decisions – Timeline (Contd.)

Date	Event	Major Decisions
January 3- 4, 2017	Eighth Meeting	<ul style="list-style-type: none"> • Issue of dual control remained unresolved. • States raised a new issue of split in tax revenue in ratio of 60:40 between states and Centre instead of equally dividing GST between Centre and states. • States demanded taxation rights for sales made in the high seas within 12 nautical miles of its coastline. • States requested to increase the number of items on which this new Cess is to be levied.
January 16, 2017	Ninth Meeting	<ul style="list-style-type: none"> • A broad consensus was reached for GST to be rolled out from 1st July 2017 instead of 1st April 2017. • The issue of dual control was broadly resolved. States will have powers to assess and administer 90 per cent of the tax payers under Rs. 1.5 crores annual turnover while the remaining 10 per cent would be controlled by the Centre. • Tax payers with turnover more than Rs 1.5 crores will be controlled and administered in 50:50 ratio both by the states and Centre. • States can levy GST within 12 nautical miles of its coastline in the high seas. • Any IGST disputes among states will be resolved by the Centre.
February 18, 2017	Tenth Meeting	<ul style="list-style-type: none"> • Formally approved Compensation law. • Some of the issues in three crucial draft CGST/SGT/IGST laws were discussed.
March 4, 2017	Eleventh Meeting	<ul style="list-style-type: none"> • Council cleared the two key draft laws of Central GST (CGST) and Integrated GST (IGST). • Hotels with annual turnover of less than ₹ 50 lakh will pay the lowest tax rate of 5 per cent under the GST regime.

Annex-I: GST Council Meeting and Major Decisions – Timeline (Concl.)

Date	Event	Major Decisions
March 16, 2017	Twelfth Meeting	<ul style="list-style-type: none"> • Cleared the remaining two supplementary legislations UTGST (Union Territory GST Law) and the SGST (State GST Law) needed for implementation of the goods and service tax (GST) regime. • Approved the bound rate of 15 per cent as peak rate for the proposed cess to be levied on certain demerit goods.
March 31, 2017	Thirteenth Meeting	<ul style="list-style-type: none"> • Approved the Rules relating to Input Tax Credit, Valuation, Composition and Transition. • Gave final approval for changes in rules for filing tax returns in the new regime, registration of entities, payment of GST, invoicing and refunds to make them compatible with GST laws.

Annex-II: Stochastic Frontier Analysis – Methodology

Following the standard stochastic frontier model for cross section analysis (Aigner *et al.*, 1977) later extended to panel data (Battese and Coelli, 1995), let

$$Y_{it} = \exp(X_{it}\beta + v_{it} - u_{it}) \dots\dots\dots (1)$$

where Y_{it} denotes own tax revenue (OTR)/taxes on commodities and services (TaxCom), X_{it} denotes vector of inputs (*viz.*, Log Per capita GSDP, Square of Log Per capita GSDP and Log share of Agriculture in GSDP) affecting tax revenue for the i^{th} state in the t^{th} period and β is a vector of unknown parameters. Error component is decomposed into two parts v_{it} and u_{it} ; v_{it} is statistical noise term with symmetric distribution while u_{it} is a non-negative error component representing the time varying technical inefficiency. The inefficiency effects are expressed as an explicit function of state-specific variables and a random error to identify the reasons for differences in predicted efficiencies between states as given below

$$u_{it} = Z_{it}\delta + W_{it} \dots\dots\dots (2)$$

where W_{it} is a random variable defined by truncation of normal distribution with zero mean and variance σ^2 and Z_{it} denotes vector of variables predicting inefficiency (*viz.*, Ratio of transfers in revenue receipts, Aggregate Expenditure to GSDP, Debt-GSDP ratio and VAT Dummy). The estimates of efficiency can be derived once the point estimates of u_{it} are obtained by the following expression;

$$Efficiency = \exp(-\hat{u}_{it}) \dots\dots\dots (3)$$

Explanatory Note on Data Sources and Methodology

Data Sources

This Report is based on the receipts and expenditure data presented in the budget documents of 29 state governments and two union territories (UTs). For accounts data, this has also been supplemented with the data taken from Finance Accounts of the state published by CAG, wherever required. Data in respect of two UTs with legislature, viz., National Capital Territory of Delhi (NCT Delhi) and Puducherry are provided separately as memo item in all Statements. The analysis conforms to the data presented in state budgets and the accounting classification thereof. The detailed Appendices are based on the classification of receipts and expenditure of individual states/UTs into revenue and capital accounts. Revenue expenditure and capital expenditure are further bifurcated into 'Plan' and 'Non-Plan'. Some supplementary information regarding outstanding guarantees (contingent liabilities), expenditure on 'wages and salaries' and 'operations and maintenance' are obtained from state governments. Data on the outstanding state-wise loans under the National Small Savings Fund have been obtained from the Ministry of Finance, Government of India. The outstanding state-wise central loans have been sourced from the Union Finance Accounts. Besides, several items of data including avilment of ways and means advances (WMA)/overdraft (OD), market borrowings, investment of state governments in central government treasury bills and the data on the state development loans (SDLs) have been taken from the Reserve Bank records. The state-wise Gross State Domestic Product (GSDP) are at factor cost (current prices) and have been sourced from the Central Statistics Office (CSO). This is supplemented by information received from the respective state governments and GSDP estimates used in the budget documents of the respective state governments. Wherever both the CSO data as well as information from state governments were not available, the data was estimated based on the previous three years' annual average growth

rate. Data on Gross Domestic Product (GDP) are at current market prices. GDP/GSDP data prior to 2011-12 correspond to base 2004-05 and data from 2011-12 onwards correspond to 2011-12 base, as published by CSO. In case of West Bengal, 2004-05 base GSDP is used as data for 2011-12 base is not available. GDP data for the year 2016-17 (BE) is taken from the Union Budget 2016-17.

Methodology

The analysis of the expenditure data is disaggregated into development and non-development expenditure. All expenditures relating to revenue account, capital outlay and loans and advances are categorised into social services, economic services and general services. While social and economic services constitute development expenditure, expenditure on general services is treated as non-development expenditure. Thus, development expenditure includes the development components of revenue expenditure, capital outlay and loans and advances by state governments. Social sector expenditure includes expenditure on social services, rural development, and food storage and warehousing (given under revenue expenditure, capital outlay and loans and advances by state governments).

The 'All States' total and national averages pertain to 29 state governments, excluding NCT Delhi and Puducherry.

The term 'Aggregate Expenditure' used in Chapter II is defined as summation of revenue expenditure, capital outlay and loans and advances. The term 'Aggregate Disbursement' used in Appendix Tables and Statements is summation of aggregate expenditure and debt repayments. The capital receipts provided in Appendix Tables (consolidated) and Statements (state-wise) and used in the analysis include public account items on a net basis while these are excluded from the respective capital expenditure. Percentage variation worked out in Appendix Tables and Statements may differ due to rounding-off of figures.

The data provided in Appendix III (capital receipts) and Appendix IV (capital expenditure) are on a gross basis for all items, including public account items. Additionally, total capital receipts taking public account items on a net basis are also given in Appendix III to have comparable data with those of the previous years. Total capital expenditure given in Appendix IV is exclusive of public account items.

The 'overall deficit/surplus' in the appendices is equal to the sum of cash deficit/ surplus (difference between the closing balance and opening balance), increase/decrease in cash balance investment account and the increase/decrease in WMA/ODs extended by the Reserve Bank.

Methodology for Debt Statistics

The Reserve Bank in its Report of 2005-06 budgets had compiled a data series on outstanding liabilities of state governments since 1990-91. In the 2006-07 Report, a revised series of outstanding liabilities was published by including data on reserve funds, deposits and advances and contingency funds of state governments. In the 2007-08 Report, a revised data series on outstanding liabilities of state governments was published from 2003-04 onwards based on the Combined Finance and Revenue Accounts of Union and state governments, Reserve Bank records, data received from the Ministry of Finance (Government of India), Union Finance

Accounts (Controller General of Accounts) and the budget documents of state governments. The present Report follows the same methodology for compilation of outstanding liabilities as given in 2007-08 Report and uses the same data sources.

The outstanding liabilities of the state governments as at end-March 2015 have been directly taken from Comptroller and Auditor General (CAG) of India's 'Combined Finance and Revenue Accounts of the Union and State Governments in India' (except for column nos. 2 to 5 and 15 in Statement 18). The outstanding liabilities position for end-March 2016 and end-March 2017 have been derived by adding annual flows [2015-16 (RE) and 2016-17 (BE)], to the outstanding amounts for end-March 2015 and end-March 2016, respectively, in conformity with recommended methodology of 'Report of the Working Group on Compilation of State Government Liabilities', 2005. Based on the statewise market loans (Statement 22), the maturity profile of outstanding state government securities is provided in Statements 23 and 24. These Statements also incorporate the appropriation of liabilities of the four bifurcated states (Bihar, Madhya Pradesh, Uttar Pradesh and Andhra Pradesh) to their respective newly formed states (Jharkhand, Chhattisgarh, Uttarakhand and Telangana) on the basis of Government of India notifications.

Note : The 'State Finances: A Study of Budgets' published since 2001-02 are available on the Reserve Bank's website. The Reserve Bank of India also released 'Compendium CD of Articles on State Finances from 1950-51 to 2010-11' in July 2011. This Compendium CD provides access to all the articles published since 1950-51 to 2010-11 at one place.

2015-16 (RE)	4,933.6 (3.6)	311.1 (0.2)	2,765.6 (2.0)	-1,857.0 (-1.4)	-30.5 (0.0)
2016-17 (BE)	4,495.2 (3.0)	-208.5 (-0.1)	1,952.8 (1.3)	-2,751.0 (-1.8)	7.9 (0.0)

RE: Revised Estimates. BE: Budget Estimates. '-': Not Available.

Note : 1. Negative (-) sign indicates surplus in deficit indicators.

2. Revenue deficit is the difference between revenue expenditure and revenue receipts.

3. Gross fiscal deficit is aggregate expenditure (aggregate disbursement net of debt repayments) *minus* revenue receipts, non-debt capital receipts.

4. Primary deficit is gross fiscal deficit minus interest payments.

5. Primary revenue deficit is revenue deficit minus interest payments.

6. Figures in parentheses are as percentage to GDP.

7. The net RBI credit to State Governments refers to variations in WMA/OD given to them by the RBI net of their incremental deposits with the RBI.

RE: Revised Estimates.

BE: Budget Estimates.

NSSF: National Small Savings Fund.

Avg.: Average.

* : Tamil Nadu has shown a negative figure of ₹13.76 billion under Loans from NCDC on account of adjustment of Tamil Nadu Industrial Development Corporation (TIDCO) bonds.

Note : 1. 'Others' is a residual item and includes, *inter alia*, Contingency Funds, appropriation to Contingency Funds, Inter-State Settlement, Land Compensation and Other Bonds and Loans from Financial Institutions other than mentioned in the Table.

2. Due to the change in the accounting procedure from 1999-2000, Loans from the Centre excludes States' share in small saving collections which is shown under Securities issued to the NSSF under Internal Debt. Accordingly, repayments of small saving collections included under repayments of Loans to Centre is now shown under discharge of Internal Debt to have consistent accounting for receipts and expenditure.

3. All figures are on a net basis.

4. As detailed break-up of Discharge of Internal Debt for Arunachal Pradesh was not available, the same has been included under 'Loans from Other Institutions'.

'-': Nil/Negligible.

Note: (1) Same as in Appendix Table 9.

(2) The detailed break-up of 'Discharge of Internal Debt' was not available for Arunachal Pradesh and the same has been included under 'Others'. The financing items under 'Internal Debt' for these States are, therefore, not on a net basis except 'Others'.

(3) 'Others' include Loans from other institutions, compensation bonds appropriation to contingency fund, inter-state settlement and contingency fund.

(4) In case of Arunachal Pradesh the contribution of respective component needs to be seen in light of surplus GFD; for both these states the positive sign of a component represent positive contribution whereas a negative sign represent a negative contribution in reduction of GFD.

‘-’: Nil/Negligible. BE: Budget Estimates.

Note: (1) Same as in Appendix Table 9.

(2) The detailed break-up of 'Discharge of Internal Debt' was not available for Arunachal Pradesh and the same has been included under 'Others'. The financing items under 'Internal Debt' for these states are, therefore, not on a net basis except 'Others'.

(3) 'Others' include Loans from other institutions, compensation bonds appropriation to contingency fund, inter-state settlement and contingency fund.

SDLs: State Development Loans. '-': Nil/Negligible.

Note: 1. For state-wise data series on outstanding liabilities prior to 2014-15, please refer to the earlier issues of 'State Finances: A Study of Budget as well as 'Handbook of Statistics on State Government Finances 2010'.

2. As detailed break-up of Discharge of Internal Debt for Arunachal Pradesh were not available, the same has been included under 'Loans from Other Institutions'.

3. Minus balance is mainly due to accounting for payments without corresponding credits which are under investigation/reconciliation by CAG.

NOTES TO APPENDICES

Appendix I:

1. Where details are not available in respect of one or several sub-groups under a major group, the relevant amount is shown against the sub-group 'Others' except for Sales Tax where the relevant amount is shown against the sub-group 'State Sales Tax'.
2. Where the break-up of grants for 'Central Plan Schemes' and 'Centrally Sponsored Schemes' are not available, the relevant amount is shown against 'Centrally Sponsored Schemes'.
3. The data are subject to rounding-off.

Appendix II:

1. Where details are not available in respect of one or several sub-groups under major groups, the relevant amount is shown against the sub-group 'Others'.
2. Negative figures for non-plan expenditure may appear for some States under a few expenditure heads on account of non-plan expenditure being derived by deducting plan expenditure from the total expenditure for the respective head as given in the Annual Financial Statement of the State.
3. The data are subject to rounding-off

Appendix III:

1. All figures are on a gross basis including those under 'Public Account'. Further, WMA from RBI is included under 'Internal Debt' while 'Cash Balance Investment Account' and 'Deposits with RBI' are included under 'Suspense and Miscellaneous'. Total capital receipts taking public accounts on a net basis are also given to provide comparable data with those of the previous years.
2. Sub-groups 'Small Savings, Provident Funds, etc.', 'Reserve Funds', 'Deposits and Advances', 'Suspense and Miscellaneous' and 'Remittances' pertain to the 'Public Account'.
3. Where details are not available in respect of one or several sub-groups under a major group, the relevant amount is shown against the sub-group 'Others'.
4. Where the break-up of loans for 'Central Plan Schemes', and 'Centrally Sponsored Schemes' are not available, the relevant amount is shown against 'Centrally Sponsored Schemes'.
5. The data are subject to rounding-off.
6. In case of Andhra Pradesh write-off of irrecoverable loans and advances amounting to Rs 0.30 billion have not been included under Recovery of loans and advances for the year 2014-15.

Appendix IV:

1. All figures are on a gross basis including those under 'Public Account' and 'Contingency Fund'. Total capital expenditure exclusive of public accounts are also given to provide comparable data with those of the previous years.
2. Where details are not available in respect of one or several sub-groups under major groups, the relevant amount is shown against the sub-group 'Others'.
3. Negative figures for non-plan expenditure may appear for some States under a few expenditure heads on account of non-plan expenditure being derived by deducting plan expenditure from the total expenditure for the respective head as given in the Annual Financial Statement of the State.
4. The data are subject to rounding-off.
