Why We Did It

The Centre for Budget and Governance Accountability (CBGA), in collaboration with Tata Trusts, has undertaken a multi-district, multi-sector project intended to expedite fund flow and fund utilisation in development schemes at the district level. Balasore in Odisha is one of the five districts selected under this study. While preparing the Quarterly Budget Update¹ for the financial year (FY) 2017-18, it was observed that a significant amount of funds under National Social Assistance Programme (NSAP)² were unutilized in Balasore.

On 17th November 2018, CBGA, with the support of Tata Trusts, organized a round table conference in Balasore. Performance of social sector schemes and the issues related to their effective implementation were discussed in this meeting. The District Collector and Project Director of the District Rural Development Agency (DRDA) of Balasore also shared their concerns in this meeting. The under-utilisation of funds under NSAP was communicated to the stakeholders of the district administration present at this meeting.

Following this, the concerned officials undertook a thorough analysis of the available funds under NSAP. Our finding was substantiated by the data recorded in the District Development Coordination and Monitoring (DISHA) Committee reports for FY 2018-19. Additionally, the District Social Security Officer (DSSO) confirmed that Rs. 17 crore was left unspent under NSAP as of November, 2018.

The unspent funds with the district’s programme budget indicated two things. Firstly, some potential beneficiaries of this scheme had been left out and that there were significant delays in distribution of benefits to the beneficiaries duly listed under social security programmes in the district³. The issue was highlighted in the local electronic and print media and officials seemed keen to rectify this anomaly by identifying more beneficiaries to enhance coverage and fund utilisation.

Concurrently, the Last Mile Linkage (LML) team of Tata Trusts was involved in the process of preparing the Village Development Plan (VDP) for two blocks in Balasore. They presented evidence to show that many deserving people were not featured in the list of recipients of social security benefits. To utilise the unspent balance under various social security programmes, government officials said that besides adding new beneficiaries, pension amounts could be disbursed in advance for the current month. The need to improve coordination between the blocks and the district administration to add missing beneficiaries and expedite utilisation of funds was recognised and acted upon.

What Results Have We Achieved

Figure 1 on Page 4 presents data from the two blocks of Balasore, where the LML team worked. It is evident that the number of beneficiaries under NSAP as well as MBPY increased, leading to an increase in the disbursal of pensions, thereby expediting fund utilisation.

Besides helping people with the application process that resulted in adding over 2,500 beneficiaries to the existing list, it was also ensured that they receive the pension amount on time. This intervention from our end resulted in leveraging public resources earmarked for the purpose of providing needs-based pension and reducing the extent of unspent balance to Rs 8 crore (from Rs 17 crore as of November 2018) in the subsequent quarters of FY 2018-19.

Further, with the help of the DSSO, a mechanism of advance pension payment process was introduced so that the amount could be disbursed to the beneficiaries for the current month as well as for the successive months in a financial year to expedite the rate of utilization of funds available with the district.

¹ Quarter-wise budget updates have been prepared for each district under this study for financial years 2018-19 and 2019-20. These documents provide the base of preparing other knowledge products. They are also a data repository on financial performance of social sector schemes in the districts.
² NSAP is intended to be the most effective cash transfer programme for widows, persons with dis-abilities and elderly people.
³ This also included Madhu Babu Pension Yojana (MBPY), the state scheme corresponding to NSAP.
Steps followed:

**Data sources were mapped to capture the extent of fund utilisation vis-à-vis demand and the existing coverage of beneficiaries under various social security programmes in the district.**

**Financial data on the performance of NSAP and other social security programmes in Balasore was collated from the district’s management information system (MIS). This was also confirmed with the concerned line department officials in the district.**

**An interaction with the DSSO was set up to share the above information and seek his guidance on how to proceed. We also took the opportunity to understand his views on the factors affecting fund utilisation, besides noting down his suggestions for corrective measures to improve fund utilisation and on how to include missing beneficiaries.**

**The collated data was grouped under four disaggregated sub-sets: quarter-wise expenditure, component-wise expenditure, block-wise expenditure and physical progress of the scheme. This was analysed to provide suggestions to the district administration.**

**Outreach programmes were conducted for the key stakeholders in the district. Subsequently, the factors that delayed the flow of funds were ascertained and a plan for effective disbursal of funds was made.**

**The fact that a significant number of potential beneficiaries were left out of the process emerged as one of the most important factors that led to underutilisation of funds.**

**The LML and CBGA teams facilitated the addition of the missing beneficiaries to the recipient list, as per the scheme guidelines.**

**The LML and CBGA teams explored the possibility of adding new beneficiaries under the NSAP and the MBPY, Odisha government’s pension plan.**

**It was realised that the beneficiaries needed help with form-filling and to fulfill other eligibility requirements. The DSSO briefed the LML team on facilitating the process of adding new beneficiaries. They underwent a rigorous orientation programme to understand the guidelines for the eligibility of beneficiaries, the procedure to fill the forms and the documents to be attached in support of the application.**

**With the support of the DSSO, the LML and CBGA teams took the initiative to help the new beneficiaries with the documentation process.**

**An opportunity to expedite the process of updating this list arose when the Odisha government organised camps at the level of Gram Panchayat under the Peoples Empowerment - Enabling Transparency and Enhancing Accountability (PEETHA) programme, which is aimed at improving transparency in the distribution of social benefits. The number of beneficiaries of both the NSAP and the MPBY schemes increased remarkably following this exercise.**

**Once the application forms were complete, they were collected and submitted to the Block Social Security Officer / DSSO. Continuous follow-up for approval of new beneficiaries and disbursement of pension amounts was undertaken.**
Important Takeaways

There is no process of automatic inclusion to consider and allow the addition of deserving beneficiaries under the NSAP and State-run pension schemes such as MBPY. Although, the scheme guidelines mention universal coverage of the members of the families identified by the Socio-Economic and Caste Census (SECC) data, lack of clarity in these guidelines and apathy of the government officials hinder full utilisation of available funds for the purpose.

Currently, the minimum age for widows to be eligible under the NSAP, is 40 years. To ensure consistency with the existing legal norms of marriage, the minimum age requirement should be reduced to 18 from 40 years to include young widows as well.

The present system mandates migration of widow or disability pensioners to the old age

This effort of Last Mile Linkage, Tata Trusts, in partnership with CBGA, resulted in expediting the extent of fund utilisation under social security schemes as well as created a positive impact in the lives of poor families by providing timely pension.

What Beneficiaries Said

“We are now getting pension every month on time, which is helpful as it allows us to spend on basic requirements such as medicines. I will get pension for the rest of my life. We also got two months’ pension amount in one month, which is a direct cash benefit in hand, thanks to Tata Trusts and CBGA who facilitated this for us.”

A beneficiary enrolled before the intervention by CBGA and Tata Trusts

“I have been requesting the sarpanch and other community leaders in my village to avail pension benefits but my request was not heard. The support of the Last Mile Team and Tata Trusts has been of great help to me. Now I am happy that I’m able to meet my needs with the pension money. God bless the volunteers who helped me.”

A beneficiary

“We have received great support from the Tata Trusts’ LML team and the Centre for Budget and Governance Accountability in enlisting new beneficiaries. They have actively facilitated the required process starting from filling of applications to collection and submission of forms. They helped me a lot in collecting the necessary application and implementing these NSAP and MBPY schemes. On behalf of my Gram Panchayat, I express my deep sense of gratitude to the Tata Trusts and the CBGA for their timely and valuable support and for emerging as an example of a fruitful GO-NGO (government and non-governmental organisations) coordination / convergence.”

The Panchayat Executive Officer (PEO)

pension scheme after turning 79, which is fraught with delays and can even result in exclusion as the onus of the paper work is on the beneficiary. It is recommended that the requirement of beneficiaries to migrate from one type of pension to another be dropped and they continue to receive the intended benefits. Alternatively, the concerned authorities should take care of the necessary paper work for migration of the beneficiaries from one scheme to the other while ensuring hassle free and timely disbursement of pension.

Identification and integration of beneficiaries should be done on a regular basis. An effective system of door-to-door registration of beneficiaries should be implemented.

About the Project

CBGA and Tata Trusts have carried out a two-year project focusing on fiscal governance reforms needed at the district level to improve fund flow and utilisation in development schemes across sectors. It focused on 10 social sector schemes (viz. SSA, MDM, NHM, ICDS, SBM, NRDWP, MGNREGS, NSAP, PMAY, PMFBY) in five districts across four states: Balasore and Bolangir in Odisha, Chandrapur in Maharashtra, East Singhbhum in Jharkhand, and Krishna in Andhra Pradesh. The project assessed the pace of fund flow, and the extent and quality of fund utilisation in select development schemes in the five districts; it has generated a host of policy suggestions to improve planning and budgeting at the district level, and improve the processes of fund flow and utilisation in social sector schemes.

About CBGA

CBGA is an independent, non-profit policy research organisation based in New Delhi. It strives to inform public discourse through rigorous analysis of government budgets in India; it also tries to foster people’s participation on a range of policy issues by demystifying them.

About Tata Trusts

Since inception in 1892, Tata Trusts, India’s oldest philanthropic organisation, has played a pioneering role in bringing about an enduring difference in the lives of the communities it serves. Guided by the principles and the vision of proactive philanthropy of the Founder, Jamsetji Tata, the Trusts’ purpose is to catalyse development across various sectors. The Trust’s work on data driven governance focuses on “strengthening rural & urban decision making systems, and associated stakeholders to leverage data and technology and move towards a more informed and participatory approach to decision making, that supports improved development outcomes for all.”
